1 Section A: RFP Information and Terms

1.1 Introduction

As the managing partner of the California Telehealth Network Consortium (hereinafter referred to as CTN-C), the University of California (UC) is issuing this RFP to obtain a comprehensive set of outsourced telecommunications and network services that in aggregate, will comprise an interoperable, secure, reliable and cost effective IP-routed WAN that interconnects a minimum of three hundred healthcare providers throughout the State of California. The resulting WAN is termed the California Telehealth Network (CTN) and will be dedicated to supporting peer-to-peer healthcare-related communications. The CTN-C intends that the CTN establish connection to or directly peer with several regional, statewide and national networks, thereby participating in a “network of networks” that supports enhanced telehealth services, including telemedicine consultation, distance education and remote patient monitoring.

1.1.1 Background

The Federal Communications Commission announced in late 2007, its decision to fund the State of California's proposal to establish a statewide California Telehealth Network. Under the FCC's Rural Health Care Pilot Program (RHCPP) – with the goal of significantly increasing access to acute, primary and preventive health care in rural America. The FCC will provide California with up to \$22.1 million over the next three years to create this network, whose goals are to:

- Create a statewide broadband network dedicated to health care, connecting public and non-profit health care providers in California's rural and urban areas, and bringing the benefits of telemedicine to the areas of California where the needs are most acute
- Over a period of three years, connect over three hundred healthcare providers throughout the state.
- Link the California Telehealth Network to a nationwide backbone, creating greater access for the state's health care providers to continuing education, research, and peer networking
- Leverage and build upon California's historic and recent investments in telehealth
- Utilize the California Telehealth Network for ongoing disaster preparedness training
- Report back to the FCC on the State of California's pilot program as to lessons learned regarding access to advanced services for public and non-profit health providers, and suggested revisions to the FCC's current rural health rules

The California Telehealth Network proposal was developed by an unprecedented statewide coalition of health care providers, governmental partners, and other organizations, including:

Health Care Providers:

- The University of California System (UC)
- The UC Office of the President (*Managing Partner*)
- The UC Davis Health System (*Project Management Lead*)
- Rural health networks and coalitions
 - The Northern Sierra Telehealth Network
 - The Community Clinics Health Network (CCHN)
 - Central Valley Health Network (CVHN)
 - The Southern Sierra Telehealth Network (SSTN)
 - Open Door Health Network/Open Door Community Health Center (ODCHC)
- The Indian Health Service (IHS) network

Governmental Partners:

- The Office of the Governor
- California Health & Human Services Agency (CHHSA)
- The Office of Statewide Health Planning and Development (OSHPD)
- California Business, Transportation and Housing Agency (BTH)
- The California Department of Managed Health Care (DMHC)
- The California Office of Emergency Services (OES)
- The California Public Utilities Commission (CPUC)
- The California Emerging Technology Fund (CETF)
- The California Institute for Telecommunications and Information Technology (Cal IT2)

Other Organizations:

- The California Hospital Association (CHA)
- The California Health Foundation and Trust (CHFT)
- The California Telemedicine & eHealth Center (CTEC)
- The California State Rural Health Association (CSRHA)
- The California Primary Care Association (CPCA)

Additional information regarding the FCC Rural Health Care Pilot Program, including a downloadable version of the complete original California RHCPP proposal to the FCC, can be found at the FCC RHCPP Web site:

<http://www.fcc.gov/cgb/rural/rhcp.html>

Additional Information regarding the California Telehealth Network (CTN) program can be found at the CTN Web site:

<http://caltelehealth.org/>

Operational management of the RHCPP at the national level is being provided by the Universal Services Administrative Company (USAC). Information regarding the USAC process can be found at the USAC RHCPP Web site:

<http://www.universalservice.org/rhc-pilot-program/default.aspx>

Specific information regarding the Rural Health Care Vendor Pilot Process can be found at the following URL:

<http://www.usac.org/rhc-pilot-program/vendors/>

1.1.2 Purpose of Request for Proposal

1. To obtain detailed written proposals from Bidders regarding their experience and capabilities in successfully delivering products and accomplishing services as described in the summary below.
2. To obtain written proposal pricing structures, work plans and implementation schedules, and proposed methodologies and approaches to be utilized.
3. To solicit proposals in a standard format that will enable UCDHS to compare and evaluate Bidders and award a contract based on the selection criteria specified herein.

1.2 General RFP Information

1.2.1 Project Authority

The Regents of the University of California (UC) have been designated as the Managing Partner of a consortium of state governmental organizations, healthcare providers and other health care-related organizations that represent the executive management of the California Telehealth Network (CTN) Project. Bidders should therefore consider UC as the Project Authority.

Throughout this RFP several terms are used to reference the CTN Project Authority:

1. University of California (UC)
2. Regents of the University of California (UC)
3. University of California Office of the President (UCOP)
4. California Telehealth Network Consortium (CTN-C)

Bidders shall consider each of these terms to equivalently reference the formal CTN Project Authority:

Regents of the University of California

1.2.2 Summary: Services Requested; Terms and Conditions

1.2.2.1 Managed Network

CTN-C intends to contract for a comprehensively Managed Network, within which a single Bidder (or consortium of Bidders) provides design, installation, maintenance and monitoring services. These services shall include:

1. Detailed Network Design, based upon general design criteria established by CTN-C and described in this document. The Design shall include:
 - a. IP addressing plan (private addressing plan)
 - b. Routers and associated equipment specifications
 - c. Circuit specifications and provisioning requirements
 - d. Network design for CTN peering and connection points with external networks
 - e. Interoperable support for H.323 and SIP protocol videoconferencing and other essential healthcare-related network services.
 - f. Provision for externally routable IP addressing for Participant access to external network services.
 - g. Any-to-any VPN security.
 - h. Explicit end-to-end QOS within the CTN.

- i. SLA-backed performance, reliability and availability.
2. Participant site assessment
3. Managed network equipment service, including purchase, programming, installation and maintenance.
4. Network monitoring service, including SNMP monitoring of active network components and provision for access to SNMP traffic for a designated third party monitoring facility.
5. Network performance, availability and reliability reporting services, including providing web-based access to various real-time and summary reporting services.
6. Customer Service Center with phone and web-based services for customer problem reporting, as well as trouble ticket tracking and resolution reporting.

1.2.2.2 Project Management

CTN-C requires that comprehensive project management services be provided during the design and installation phases of the CTN RHCPP. These services shall include:

1. Dedicated project management staff.
2. Statewide availability of comprehensive staff and resources for coordination and implementation.
3. Formalized methodology for planning and tracking project activities using industry-accepted project management methodologies.
4. Regular project implementation status update reporting and coordination with CTN-C Management.

1.2.2.3 Prime Contractor, Consortiums of Bidders and Single Award

The RFP is available for all individual companies or strategic teams who may be interested in supplying telecommunications and network services to the CTN. Potential Bidders should be aware however, of two mandatory contractual requirements.

1. CTN-C will award a single contract comprising all requested services. No partial or split awards will be made.
2. CTN-C requires that each proposal identify a Prime Contractor and that the Prime Contractor shall bear full responsibility for the awarded Contract. Bidders are encouraged to create partnerships with multiple subcontractors. However, as the “single” provider and single point of contact for the awarded Contract, Prime Contractor shall bear the full responsibility for their awarded Contract and all subcontractor, subsidiaries and affiliates.

1.2.2.4 CTN Proposed Network Design

The FCC Rural Pilot Program Order specifies that: “Awardees will implement the network as specified in their proposals(see the CTN Web site for an online reference to the FCC RHCPP Order). The CTN Proposal has specified a Proposed Network Design (see the CTN Web site

for an online reference to the CTN Proposal). In accordance with the FCC Rural Pilot Program Order, the design as specified in the CTN Proposal is the “Proposed Network Design.” The CTN proposal however, also allows for Alternative Designs, permitting Bidders to submit for consideration, network architecture designs that may offer superior cost or performance advantages. Alternative designs must meet or exceed all designated criteria and requirements as specified in this RFP, including but not limited to:

1. Performance
2. Geographic availability
3. Interoperability
4. Reliability underwritten by Service Level Agreements (SLA)
5. Any-to-any VPN security
6. Explicit end-to-end quality of service (QOS)
7. Cost

In order to be selected, an alternative design in aggregate must be adjudged to offer superior price and performance over proposals adopting the Proposed Network Design. Moreover, as stipulated in the following section, alternative design proposals must encompass the entire geographic extent of the CTN and accommodate the entire list of initial CTN participants, as tabulated in Appendices C and D of this RFP. Bidders submitting alternative designs are advised to discuss in detail, the relative merits of their design in comparison to the Proposed Network Design, for each of the designated design requirements.

1.2.2.5 Geographic Scope of Proposal

CTN requires a network design and resulting services that encompass the entire statewide cadre of participants as designated in Appendices C and D of this RFP, with demonstrated capabilities to accommodate substantial expansion in both number of participant sites as well as increases in bandwidth availability. Bidders will be asked in later sections to discuss the capabilities of their design and services to accommodate future expansion, with respect to geographic extent, participant numbers and bandwidth availability.

1.2.2.6 Priority for Rural Participants

The FCC RHCPP Program has been established primarily to assist health care facilities that are located in rural locations. Accordingly, in selecting and prioritizing the multiple CTN Participants for actual participation in the project, CTN-C will assign the highest priority to rural Participants. Special consideration will be given to rural participants located in historically “hard to reach” locations. In the event that funding or other constraints dictate that the entire complement of Participants included in this RFP cannot be accommodated within this project, the final decision regarding which of the Participants will be included in the CTN will be solely within the purview of the CTN-C. For purposes of responding to this RFP, Bidder’s are required to provide a connection solution and associated pricing for each of the Participants included in Appendices C and D.

Certain geographic locations situated in remote locations currently have marginal or inadequate telecommunications infrastructure supported by traditional ILEC and/or CLEC providers. Consequently, the existing telecommunications infrastructure that serves certain of these rural sites may not be adequate to support the preferred, perhaps not even the minimum acceptable bandwidth capacity as stipulated in this RFP. CTN-C recognizes that installation of extensive landline or other physical infrastructure may not be financially practical solely to support a limited constituency within a given geographic area. Nonetheless, Bidders are encouraged to exercise creativity in providing effective solutions for these disadvantaged participants.

Although Bidder's overall cost quotation for the project will be an important criterion for selecting the finalist Bidder, CTN-C will give offsetting consideration to proposals that provide creative, effective solutions for connectivity to "hard to reach" rural participants.

Appendix C of this RFP contains a table listing each of the prospective CTN Participants. The table contains a column entry labeled "RUCA". The Rural-Urban Commuting Area (RUCA) is a standardized system of classifying communities with regard to their "rurality." RUCA scores span the approximate range 1 – 10 with 1 being the least rural and 10+ being the most rural. Bidder's should give special consideration to all sites with RUCA scores 7 and above.

1.2.2.7 Defined Three Year Implementation Schedule

The CTN-C requires that Contractor commit to a maximum three-year implementation schedule, subject to extensions due to circumstances beyond Contractor's control. This shall result in a fully operational network comprised of a minimum of 300 participants at the end of three calendar years from date of inception of the project. Connections with external networks as specified in this RFP shall also be installed and fully operational. Bidders will be required to describe in detail, how their project management plan accomplishes these requirements.

1.2.2.8 Geographic Equity in Distribution of Participants

The CTN will be geographically dispersed throughout the entire State of California. The CTN RHCPP proposal presents a phased implementation of approximately 100 participants per year over the three-year period (see Section 6-7, CTN RHCPP Proposal). The methodology used for establishing this sequencing of connecting participants is based upon the CTN-C requirement to equitably distribute implementation efforts throughout the state on a geographic basis; i.e., no geographic area of the State will receive preferential priority, either with respect to resources expended or number of participants connected. CTN-C recognizes that many mitigating factors may influence the precise order of participant connection; however, Bidder's implementation plans will be required to demonstrate sufficient flexibility to accommodate ad hoc changes while adhering to the overall goal of maintaining geographic equity. Bidder's will be required to demonstrate that project management, technical and administrative staff and resources will be assigned to the project to a sufficient extent that a statewide implementation can be supported.

1.2.2.9 CTN Participant Pool and Available Financial Resources

Appendices C and D contain a comprehensive list of CTN Participant Candidates (Appendix C) and RTN Hub sites (Appendix D) that have formally submitted their applications for membership to CTN-C. The total complement of sites exceeds 700. CTN-C is aware that the total number of CTN Participants that can actually be accommodated will depend upon a number of factors, including:

- a. Pricing provided by the selected Bidder
- b. Availability of additional funding sources
- c. Opportunities for implementing offsetting cost avoidance
- d. Potential financial participation by additional partners

Based upon the results of this RFP process, CTN-C will determine the total number of Participant candidates that will actually be included in the CTN RHCPP. The intent is to connect as many Participant Candidates as possible, given the financial and other limitations imposed. Currently, the CTN-C expects a total funding amount of approximately \$24.5 million to be available to support Contractor-provided services over a minimum three-year period.

For purposes of responding to this RFP, Bidders should calibrate all network design parameters, implementation resources, capacity estimates and support infrastructure sufficient to accommodate the entire complement of 700+ CTN Participant candidates included in Appendices C and D.

NOTE: Bidders will advantage their proposals by providing resources and pricing consistent with enrolling the largest possible number of CTN Participant candidates.

1.2.2.10 CTN Participants and Network Connectivity

The CTN will be comprised of three principal groups of participants. Bidder shall be required to connect all the individual participants comprising each group. CTN-C recognizes that the mode of network connection required to connect each group of participants may vary. In a later section, Bidders are required to describe how each of the three participant groups will be incorporated into a unified CTN network architecture. The three groups of participants are as follows:

1.2.2.10.1 Individual Participant Sites

The majority of CTN participants are not affiliated with an existing Regional Telehealth Network (RTN: see description of RTN below), nor do they have WAN access through participation in a regional, statewide or national educational or research network infrastructure. Some members of this group may subscribe to public Internet access services through an ISP. Each member of this group will require a dedicated connection to the CTN. Appendix C of this RFP contains a table listing the currently proposed CTN Participant Sites comprising this group

1.2.2.10.2 Regional Telehealth Networks (RTN)

Certain CTN participants are members of an RTN. RTN's are regional networks comprised of individual clinics and hospitals that cooperatively participate in healthcare-related activities. An example of an RTN is the Northern Sierra Rural Health Network. The following URL provides additional information for this RTN:

http://www.nsrhn.org/index.php?option=com_frontpage&Itemid=1

Appendix D of this RFP contains a table listing the currently proposed Regional Telehealth Networks (RTN's) that will initially participate in the CTN. Each RTN currently interconnects multiple client sites to an RTN Regional Hub (RTN-RH). Connections to the RTN-RH may be via switched (ISDN) or dedicated circuits (DS1). The RTN-RH provides gateway services to external healthcare provider networks and/or the public Internet. RTN's are typically comprised of twenty or less participant locations.

1.2.2.10.3 Educational and Research Networks Connecting CTN Participants

Some CTN Participant sites participate in regional or statewide educational and research networks. For these groups an individual connection to each site will not be required. Bidder shall establish connections to these sites by provisioning a high bandwidth direct connection, or peering with, the respective networks that support these sites. Examples of such sites are the University of California Medical Centers that participate in the Corporation for Education Network Initiatives in California (CENIC) Educational Network.

1.2.2.11 Participant Connection Types Required

In the Technical Requirements Section, Bidders will be required to propose the following specific connection types for CTN Participants, as applicable:

2. Dedicated connection from each Individual Participant site to the CTN.
3. Single dedicated connection from each RTN Hub site to the CTN.
4. Dedicated individual connections from each RTN Participant site to the CTN, bypassing and eliminating the RTN Hubs.
5. Connecting to or peering with, educational networks external to the CTN for the purpose of communicating with CTN Participants that are members of these external networks (e.g., UC).

1.2.2.12 National Educational and Research Networks

CTN RFP #2008-001

The RHCPP will fund CTN to participate in two national educational and research networks:

1. National LambdaRail
2. Internet 2

CTN-C desires to participate in both of these national networks. In the Technical Requirements Section, Bidders will be required to propose infrastructure and methodologies for connecting the CTN to these External Networks.

1.2.2.13 Grouping of Participants

In multiple sections of this RFP, Bidders are required to provide detailed technical and other information regarding each participant or RTN listed in Appendices C and D. Since it is anticipated that Bidders may propose an identical network configuration or solution for multiple participants, Bidders are permitted to group participants for the purpose of responding.

Bidder shall define each grouping used by including in their proposal, a Group Definition Spreadsheet, using the spreadsheet template provided in Appendix E.

In their RFP response, Bidders shall refer to the groups by Group Name, as designated in the Group Definition Spreadsheet (e.g., GP1, GP2, etc.).

For each requirement listed in this RFP requiring a response for each participant, the sum of participants included in groups plus individually listed participants must equal the total number of participants listed in Appendix C and/or D, as applicable.

1.2.3 Summary: Financial Terms and Conditions

CTN-C has established price caps that will apply to all Contractor-provided services that are equivalent to services available under the State of California CalNET 2 Master Service Agreements MSA-1 through MSA-4. Bidders are encouraged to enhance the competitiveness of their bids by providing pricing below CalNET 2 terms.

NOTE: Bidder will receive additional quality points for proposals offering pricing for equivalent services at or below CalNET 2 price caps.

Additional financial requirements include:

1. Statewide pricing (Postalized rates) for CalNET2 equivalent products and services
2. Fixed pricing for the three-year term of the Contract.
3. Month-to-month service commitments.
4. Adherence to USAC-RHCPP invoicing and payment policies and procedures.

5. Aggregate, itemized invoicing for all non-recurring and recurring charges accrued by Contractor and all Subcontractors.

1.2.3.1 Economic Sustainability features

CTN-C will review proposals from three principal perspectives:

1. Technical Merit
2. Cost Effectiveness
3. Capabilities to enhance economic sustainability

In a later section, Bidders will be requested to discuss how their design can facilitate long-term economic sustainability of the CTN. The FCC RHCPP will subsidize supported services for a maximum period of five years, or until the awarded funds are expended. Following that period, the CTN must become financially self-sustaining, or must identify alternative funding sources to support continued operation. CTN-C will aggressively study alternative funding sources and will develop a strategy for sustainable funding alternatives. These may include:

1. Partial or full funding by CTN participants
2. Grants and alternative government programs (e.g., USAC).
3. Leasing of network resources to government or non-profit entities.
4. Converged Network Services that promote cost avoidance

CTN-C encourages Bidders to discuss how their design possesses inherent capabilities to support converged services (e.g., VOIP), or other features which if implemented, could lead to cost avoidance for currently non-converged services. Such savings could partially or fully amortize CTN costs.

1.2.4 Glossary of Abbreviations

Appendix G contains a Glossary of abbreviated terms and acronyms used in this RFP.

1.3 RFP Process

1.3.1.1 Formal RFP Posting

This RFP has been formally posted on two Web sites:

1. USAC Rural Health Care Pilot Program (RHCPP) Web site:

<http://www.usac.org/rhc-pilot-program/default.aspx>

2. California Telehealth Network (CTN) Web site.

<http://www.caltelehealth.org/>

Bidder's can obtain authoritative copies of the RFP only from these sites.

1.3.1.2 Format of RFP Posting and Alternative Format

For purposes of posting on the USAC RHCPP web site, this RFP and associated appendices and worksheets have been converted to PDF format. Bidders will be required to submit responses in Microsoft Office 2007 format. Bidders may obtain the RFP and all associated appendices and worksheets in the appropriate Microsoft Office 2007 format from the CTN Web site.

1.3.1.3 Vendor Inquiries

Inquiries regarding this RFP process and the functional or technical requirements of the proposed systems must be addressed in writing. The CTN-C contact person and his address are listed below. Questions via email are preferred

David J. Harry Ph.D.
Director of Operations
California Telehealth Network
Center for Health and Technology
Sherman Bldg, Suite 3900
2300 Stockton Blvd
UCDMC
Sacramento CA 95817
email: ctn@ucdmc.ucdavis.edu
Phone: (916) 734-3008; Fax: (916) 784-7643

1.3.1.4 Vendor Inquiry Responses and RFP Modifications

All Bidder inquiries will remain anonymous. All responses to questions submitted by Bidders will be posted on the publicly accessible Website listed below.

All changes, additions and corrections to, as well as deletions from the RFP will be via addendum. Addenda will be posted, together with explanatory information, at the following publicly accessible website:

<http://www.caltelehealth.org/>

Bidders are advised to consult this website on a regular basis, for up-to-date information and any new or modified requirements for responsive RFP proposals.

1.3.1.5 Completeness Requirements for a Responsive Proposal

Bidders are required to include a response to every item within this RFP that is labeled by one of the following headings:

- Bidder Response (M)
- Bidder Response (MO)

Bidders may optionally respond to items labeled by the following heading:

- Bidder Response (D)

Items labeled (M) are Mandatory requirements. Bidder proposals that do not provide the stipulated products or services will be deemed non-responsive.

Items labeled (MO) are Mandatory requirements. Bidder proposals that do not provide the stipulated products or services will be deemed non-responsive; however, CTN-C may elect to not contract for these services.

Items labeled (D) are desired services. Bidders are not required to submit proposals for these products or services; however, additional quality points will be awarded to proposals that provide these products or services.

Bidders are required to include within their cost proposal, a designation of associated cost for the products, services and features included within each these labeled items. Detailed information regarding submission of responsive cost proposals are provided in Section F of this RFP.

1.3.1.6 Proposal Submittal Instructions

CTN RFP #2008-001

Each Bidder is required to submit ten (10) printed copies and one (1) CD-ROM copy, for each of the “Submittals Required”, as listed below.

Electronic documents will be submitted in the following formats, as appropriate:

- Documents: Microsoft Word 2007 for Windows
- Spreadsheets: Microsoft Excel 2007 for Windows
- Graphics: Microsoft Visio 2007 for Windows

1.3.1.7 Submittals Required

Bidder submittals must be comprised of three separate components:

1. Bidder Qualification Statement
2. Technical Requirements Proposal
3. Cost Proposal

Bidders are required to submit proposals formatted in such a fashion that the Bidder’s Qualification Statement, Technical Requirements Proposal (Section B), and Cost Proposal (Section D) can be individually separated for purposes of review. Printed copies should have Bidder’s Qualification Statement; Technical Requirements, Section B; and Cost Reporting, Section D; each mounted or bound separately.

Electronic copies should provide each component on a separate CD-ROM.

1.3.1.8 Proposal Submission: Mailing Address

Proposal responses must be mailed or hand delivered to:

California Telehealth Network
Center for Health and Technology
Sherman Bldg, Suite 3900
2300 Stockton Blvd
UCDMC
Sacramento CA 95817
REF: RFP # 2008-001

1.3.1.9 Proposal Submission: Due Date

All proposals submitted must be received no later than 4:00 p.m. PST on the Due Date.

Due date will be established as 60 calendar days following the official posting of this RFP on the USAC RHCPP web site.

1.3.1.10 Schedule of Events

Event	Date
Release of Request for Proposals	Day 1*
Receipt of Bidders' Written Questions on RFP	Day 2 - 45
Receipt of Proposals	Day 2 - 60
Semi-Finalist Bidder Notifications	Day 90 - 95
Oral Presentations (if deemed necessary)	Day 120 - 130
Completion of Evaluation Process and Award Announcement	Day 140
Initiation of Contract Negotiations	Day 150

** Number of days following posting of CTN RFP #2008-001 on the USAC Website (schedule is approximate)*

1.3.1.11 Basis of Award

Proposals will be evaluated on the basis of cost per quality points. A CTN-C evaluation committee will choose the selected Bidder. Committee participants will review, evaluate, and score each responsive proposal received in accordance with predetermined scoring criteria. The selection process will be broken down into three phases.

1.3.1.12 Phase I – Bidder Qualification Assessment

To be considered responsive and to continue in the scoring process, the Bidder must:

1. Provide all documentation as requested by the requested due date.
2. Provide a proposal that is complete and complies with the instructions and requirements as stated herein.
3. Provide a Bidder Qualification Statement that meets the following requirements:
 - a. Establish satisfactorily financial solvency.
 - b. Demonstrate recent successes in installation and implementation of Managed Network Services and Infrastructure of similar scope and scale.

Upon completion of Phase I assessment, Bidder's will be notified in writing and by email of the results of the Basic Qualifications Assessment.

1.3.1.13 Phase II

Bidders who satisfactorily meet the Phase I criteria will have their submitted proposals qualified for the detailed scoring process. In this phase, the Bidder's response will undergo intensive evaluation. The following criteria (not in priority order) will be utilized to select a "short list" of finalists:

CTN RFP #2008-001

1. Overall Bidder qualifications, including years in business, financial status, and background information.
2. Technical quality of the proposed network infrastructure, including stated network performance and QOS metrics.
3. Capabilities to design implement and maintain required connections to external networks.
4. Extent of managed services offerings.
5. Quality of support services (network monitoring, customer support center services, etc.)
6. SLA commitments for reliability/support/maintenance/performance.
7. Bidder’s proven ability to implement product(s) in a timely and effective manner.
8. Proposed approach to the project, including a project schedule and specific work plan for implementation and completion of all tasks.
9. Compliance with CTN-C's specified terms and conditions.
10. Sustainability of the proposed network after termination of the RHCPP.
11. Life-Cycle Cost of Bidder’s proposal.

Each Bidder will receive a total point score known as quality points.

Quality points will be assigned as follows:

Requirement	Quality Points
Network Architecture	1500
Quality of Service	500
Security	500
Project Management	1000
External Network Connections	500
Service Level Agreements	500
Enhanced Features Quality Points	1000
Financial Sustainability	500
Comprehensive Support for Remote Rural Participants	500

The total cost for each proposal will be divided by the proposal’s total quality points to determine the cost per quality point ratio. The cost per quality point ratio for each Bidder will be ranked in order of magnitude. The Bidders receiving the lowest cost per quality point scores will be placed on the “short list” of finalists. For example:

	Total Quality Points (max 1600)	Total Bid Price
Bidder A	1150	\$110,000
Bidder B	950	\$105,000
Bidder C	1300	\$139,500
Bidder D	1475	\$204,000

CTN RFP #2008-001

To calculate the cost per quality point, divide the total bid price by the total quality points received:

Bidder A:	$\frac{110,000}{1150}$	=	95.65
Bidder B:	$\frac{105,000}{950}$	=	110.53
Bidder C:	$\frac{139,500}{1300}$	=	107.31
Bidder D:	$\frac{204,000}{1475}$	=	138.31

In this example, Bidders A and C would be finalists.

CTN-C intends to use Life-Cycle-Cost techniques in evaluating the cost of the requested services. Recurring and non-recurring costs for all mandatory and mandatory-optional services will be totaled for the expected three-year term of the project contract.

NOTE: costs for services that CTN-C has designated, as “desirable” services in this RFP, will not be added to the project life cycle cost for purposes of computing Bidder’s cost per quality point. Assessment of cost per quality point for “desirable” services will only be employed for purposes of “tie-breaking”, in the event that two or more Bidders receive equivalent cost per quality point scores for mandatory and mandatory-optional services.

NOTE: CTN-C will select a maximum of three semi-finalists

1.3.1.14 Phase III

At the sole discretion of the CTN-C, a finalist Bidder may be directly selected from the group of semi-finalists, based upon lowest cost per quality point scores. Alternatively, CTN-C may elect to schedule Bidder oral presentations. Semi-finalist Bidder presentations will be scored and the additional quality points awarded will be added to their totals and a new cost per quality point determination and ranking will be made.

At the end of Phase III, a finalist Bidder will be selected, ***based primarily, but not solely*** * on lowest cost per quality point ranking.

1.3.1.15 *FCC Order, Proposal Ranking and Bidder Selection

CTN RFP #2008-001

The FCC RHCPP Order specifies that selected participants (e.g., CTN-C) are not required to select the lowest cost bidder for services. According to the Order, cost is not required to be the most important selection criterion, but must be one of the selection criteria used to evaluate proposals.

In accordance with the FCC RHCPP Order, CTN-C reserves the sole prerogative to uniformly assign a weighting factor to all Bidders' project cost proposals, that will have the effect of more heavily weighting quality scores.

Following evaluation of this RFP and Bidder selection, CTN-C expects to negotiate a contract with the selected Bidder.

CTN-C reserves the right to award this RFP in part or in full.

1.3.2 Proposal Conditions

1. Notwithstanding any other provision of the RFP, Bidders are hereby advised that this RFP is a solicitation of proposals only and is not to be construed as an offer to enter into any contract or agreement. Thus, CTN-C reserves the unqualified right to reject any or all proposals for any reason.
2. CTN-C shall have the unconditional and unqualified right to withdraw, cancel, or amend this RFP at any time. Bidders shall bear all costs associated with the preparation and furnishing of responses to this RFP. CTN-C, in its sole discretion, reserves the right to determine whether any Bidder meets the minimum qualification standards, to determine whether a proposal is responsive, and to select a proposal which best serves its programmatic objectives. CTN-C reserves the right to negotiate a binding contract with the selected Bidder.
3. All proposals shall be firm for a period of 180 days following the proposal submission due date.
4. Responses to this RFP should be made according to the instructions contained herein. Failure to adhere to RFP instructions may be cause for rejection of the proposal. A proposal that contains conditions or limitations set up by the Bidder may be deemed irregular and subsequently rejected by CTN-C.
5. False, incomplete, or unresponsive statements in the proposal response may be cause for its rejection. The evaluation and determination of the fulfillment of the RFP requirements will be CTN-C's responsibility and its judgment shall be final.
6. CTN-C reserves the right to interpret or change any provision of this RFP at any time prior to the proposal submission date. Such interpretation or change shall be in the form of a written addendum to this RFP. Such addendum will become part of this RFP and any resultant contract. Such addendum shall be made available to each company that has received an RFP. Should such addendum require additional information not previously requested, a Bidder's failure to address the requirements of such addendum in the proposal response may result in the proposal not being considered.
7. CTN-C has, at its sole discretion, the unconditional and unqualified right to determine that a time extension is required for submission of proposals, in which case, a written RFP addendum issued by CTN-C shall indicate the new submission date for proposals.
8. Prior to the final submission date, any Bidder may retrieve its proposal to make additions or alterations. Such retrieval, however, shall not extend the final submission date.
9. Bidders wishing to submit proposals in response to this request do so entirely at their own expense, and submission of a proposal indicates acceptance of the conditions contained in the RFP unless clearly and specifically noted otherwise.
10. PUBLIC INFORMATION AND TRADE SECRETS--The California Public Records Act limits CTN-C's ability to withhold pre-qualification and bid data to trade secrets or records, the disclosure of which is exempt or prohibited pursuant to federal or state law. If a submittal contains any trade secrets that Bidder does not want disclosed to the public or used by CTN-C for any purpose other than evaluation of the Bidder's eligibility, each sheet of such information must be marked with the designation "Confidential." The CTN-C will notify Bidder of data so classified upon receipt of any request to inspect such

CTN RFP #2008-001

data so that Bidder will have an opportunity to establish that such information is exempt from inspection in any proceeding to compel inspection.

11. All computer programs and data made available by CTN-C to Bidders hereunder shall remain the property of the CTN-C and shall be maintained, used, and disseminated in accordance with the California Information Practices Act of 1911, Civil code Sections 1798 through 1798.76, and the California Public Records Act, Government Code Section 6250 through 6260.

1.3.3 Contract Terms and Conditions

The Regents of the University of California will serve as the legal entity with which the successful Bidder will execute a contract pursuant to this RFP. The terms: "University", "University of California," "Regents of the University of California" and "CTN-C" are used interchangeably in this RFP. For all legal and contractual purposes, these terms shall be interpreted as designating: "The Regents of the University of California."

1. The University's Terms and Conditions of Purchase (See Appendix A) shall apply to any contract for hardware or hardware-related services awarded from this solicitation for proposals. The selected Bidder will be required to comply with all the terms and conditions as specified therein. A Bidder's inability to comply with, or exceptions and modifications to, the terms and conditions incorporated in Appendix A must be stated in its proposal and may disqualify Bidder from further consideration.

To facilitate timely award of this contract, each Bidder must certify its ability to comply with the insurance requirements outlined in Appendix A. **The University will require the selected Bidder to furnish a certificate of insurance naming The Regents of the University of California as an additional insured.** Such certificate of insurance shall be in a form as issued by an insurer approved by the University and shall contain an endorsement requiring not less than thirty (30) days' written notice to the University prior to any cancellation or modification thereof. Thereafter, a certificate evidencing the renewal of each such policy shall be furnished to the University at least ten (10) days prior to the expiration of the term of said policy. Failure to comply with this requirement may result in cancellation of any contract resulting from this Request for Proposal.

The University reserves the right to adjust the minimum insurance limits specified in Appendix A, based on the overall risk assessment of the project. Each Bidder must provide evidence of its current coverage with its proposal.

The final contract(s) with the selected Bidder(s) will be **prepared by the UCDHS Purchasing Department** and will incorporate this Request for Proposal, including its Appendices and Addenda (if any), and the submitted proposal.

2. The University reserves the right to cancel any contracts resulting from this RFP, for cause, at any time or at the end of any fiscal year (June 30), should insufficient funds be budgeted in the following year to continue the contract, by giving 120 days' written notice and upon payment of costs actually incurred by the Bidder prior to the notice of cancellation.
3. Records developed by the Bidder and related to the project costs will be maintained for a period of five years following the completion of the project.
4. The Bidder or Bidders awarded a contract as a result of this RFP may not assign or sublet the whole or any part of the contract without the prior written consent of the University.

5. The Bidder must warrant that, for a minimum of one (1) year from final acceptance of each hardware component and software package included in the proposed system, the hardware and software shall meet all of the specifications set forth in Bidder's proposal and in the operational manuals current as of the date of University's final acceptance of such hardware and software products and will be free of defects. In the event of the Bidder's breach of its warranty hereunder, the University shall have the option to repair or replace the hardware and/or software, and the Bidder will be liable for excess costs incurred by University therefor.
6. No form of the University's name shall be used in promotional materials, signs, announcements, or other forms of communication or advertising originated by Bidder unless the University's express written permission for such use has been obtained in advance.

1.3.4 Bidder Qualification Statement

The Qualification Statement must contain a description of the Bidder's corporate qualifications, area of expertise, and prior experience with providing systems and services similar to those described in this RFP, including but not limited to the following.

1. Provide the Bidder's name, address, telephone and facsimile numbers, a contact name, a brief description of the company's history, including name and address of the parent company, the size of the company, and an organization chart.
2. Provide a corporate profile, service portfolio, and description of the Bidder's service philosophy and approach. What separates and distinguishes this Bidder from other applicants?
3. Provide a report of the Bidder's financial status, including the most recently audited financial statements and profit and loss statements or equivalent evidence of financial stability.
4. Provide gross revenue figures for 2007 and percentage growth from 2005 -- for total company revenue, revenue associated with healthcare communications systems, and revenue for the products and services included in your response.
5. Provide an indication of whether the Bidder qualifies as a woman-owned or minority-owned business (Each Bidder is required to complete Appendix B, Business Information Form.).
6. Identify by name and University position any University officer, faculty member or other employee who holds a position of director, officer, partner, trustee, manager or employee in the Bidder's company, as well as the name of any near relatives who are employed by the University.
7. Provide a statement of the total dollar amount of products and services provided by Bidder for the University of California in the past twelve (12) months and specify the campus (es) served.
The contract will not be awarded to any Bidder that has failed to perform in a satisfactory or faithful manner on any previous contract or purchase order with the University of California.
8. Identify which managed services and modules included in your RFP response will be provided by subcontractors versus provided directly by your company.
9. Describe your investment (dollars and resources) in research and development associated with new healthcare products and services. Include the percentage of R&D spending as a percentage of total revenue for the years 2005-2007. Include the number or percentage of staff devoted to research and development.
10. Profiles of the major officers in your company: backgrounds, credentials, and length of service, areas of expertise, role and responsibilities relative to proposed services.
11. Describe the vision of your company and the strategic direction of product development efforts as they relate to the proposed managed network services, e.g., product development, functional enhancements, product architecture, target market.
12. Each Bidder must provide a reference list of three clients located in California, if possible, for whom the Bidder was directly responsible for providing products or services

similar to those requested herein within the past two years. The references may be from current or prior clients. The references will be used as a basis for inquiry concerning the Bidder's quality of products and service.

Furnishing incorrect and/or incomplete reference information may lead to Bidder's elimination from consideration for award. The decision to eliminate Bidder from consideration for award for poor reference checks or for incorrect and/or incomplete reference information shall be at the sole discretion of UCDHS and shall not be subject to appeal.

13. What is the approximate total number of fully operational implementations of the proposed managed network services that your company currently supports?
14. What is the approximate number of managed network services projects currently in implementation?
15. CTN-C may wish to review the selection of particular individuals for the project team and interview these individuals before a final selection is made. Is this acceptable to Bidder? Changes in key staff assignments will not be allowed without prior approval of CTN-C. CTN-C reserves the right to terminate the agreement at any time if any of the staff assignments are unacceptable to CTN-C.
16. Unless otherwise indicated in the proposal response, the selected Bidder must perform all work. Any work that is to be subcontracted by the Bidder will be subject to the terms and conditions of this RFP and any resultant contract or purchase order awarded.
17. Describe your capabilities to extend the proposed managed network to a regional (i.e., West Coast) or nation-wide extent.
18. Describe your capabilities to extend the proposed managed network to include international connections.
19. Provide blank copies of all appropriate standard contracts including, but not limited to, hardware, software, maintenance, implementation, managed services, etc.

2 Section B: Technical Requirements

2.1 CTN Project: Bidder Overview and Executive Summary

2.1.1.1.1 Bidder Response: (M) Executive Summary

Based upon the high level description of the network design described in the CTN RHCPP Proposal (see CTN Proposal, pages 17 – 20 and Appendix A – Proposed Network Design, as well as the requirements listed under “Services Requested” in Section A of this RFP), provide a brief narrative summary of Bidder’s proposed CTN network infrastructure. The summary should be a high-level overview. CTN-C will use Bidder’s Overview to inform the CTN Advisory Committee, as well as other decision-making bodies, during the course of RFP bid evaluations. Later in the RFP, Bidders will be requested to provide more detailed information. Use this summary as an opportunity to describe in general terms, how the Bidder’s proposal will meet the overall goal of providing a seamless, IP routed Layer 3 VPN, that will facilitate clinical care, continuing medical education and clinical research throughout the requested statewide coverage areas. Include in the summary a brief discussion of each of the following key requirements:

- Network design support, including IP addressing plan, routed infrastructure design, and connection to external networks.
- Statewide, integrated network
- Support for IP routed, fully meshed, Layer 3 any-to-any VPN design
- Provides traffic segmentation and security via IETF RFC 2547–compliant MPLS VPN (or equivalent) encompassing all participant connections.
- Support for multiple levels of packet-level delineated QOS
- Seamless peering with external networks, preserving QOS and VPN security requirements.
- Capability to provide comprehensive Managed network services, including design, installation, maintenance, monitoring and customer support.
- Ability to adhere to a challenging project implementation timeline of interconnecting a geographically dispersed cadre of over 300 participant sites within a maximum three-year timeframe.

2.2 Regional Hub Architecture – Physical Connections and Physical Plant Infrastructure

2.2.1 Regional Hub locations and configurations

2.2.1.1.1.1 Bidder Response (M): Regional Hub Locations and Configurations

For each of the proposed CTN participants listed in Appendix C of this RFP, or Bidder-designated groups of equivalent CTN participants, describe the RH infrastructure (PE-POP's) that will provide physical connectivity (see "Grouping of Participants" in Section A, as well as Appendix E of this RFP for instructions on grouping participants).

Provider Edge POP's:

1. Geographic location
2. Number and identity of CTN participants connected
3. Approximate local loop distance between the PE-POP and the ILEC/CLEC CO.
4. Describe the physical security, power redundancy and environmental hardening at each PE POP and Core routing center.
5. Logical security employed (e.g., video surveillance).
6. Availability of 24 x 7 technical personnel support
7. Whether facility is dedicated to CTN or is a shared facility.
8. Provide diagrams that illustrate the approximate geographic locations of PE-POP's.

2.2.2 Regional Hub Aggregation

2.2.2.1.1.1 Bidder Response (M): Regional Hub Aggregation

Describe for the proposed RH infrastructure, how the RH's will be connected into a statewide backbone (Core). For each proposed RH (or collection of Bidder-designated equivalent RH's), describe the Core routing facilities that serve as the Core meet point. Include in the description:

1. Approximate location of each PE-POP - Core meet point.
2. Type of facility that serves as the meet point (e.g., telecommunications CO, Private Hub facility, etc.).
3. Description of physical redundancy of PE-POP to Core connectivity.
4. Describe how any required trunking or backhaul circuits are sized such that QOS will be maintained and that the aggregated bandwidth from all connected CTN participants can be accommodated with no oversubscription.
5. If not described previously in Question(s) 1 - 8 above, provide a description of the physical plant, including:
 - a. HVAC and availability of redundant power
 - b. Availability of 24 x 7 technical personnel support

- c. Whether facility is dedicated to CTN or is a shared facility.
 - d. Physical and logical security employed.
6. Provide diagrams that illustrate the Provider network architecture as it pertains to interconnecting PE-POP's to Provider's routed Core Network.

2.2.3 Network Routers

2.2.3.1.1.1 Bidder Response (M): Network Routers

For the PE- POP's and Core routing centers associated with providing service to the designated CTN participants, provide the following information:

Identify the manufacturer and model # of the PE routers used in POP's

- Is each POP equipped with a minimum of dual PE routers?
- Are PE routers equipped with dual route processors?
- Are POP's suitably equipped such that scheduled or unscheduled maintenance on PE routers will not result in any service interruption?

Identify the manufacturer and model # of the Core routers used in Core POP's

1. Is each POP equipped with a minimum of dual Core routers?
2. Are Core routers equipped with a minimum of dual route processors?
3. Are POP's suitably equipped such that scheduled or unscheduled maintenance on Core routers will not result in any service interruption?
4. Describe the circuit capacities that interconnect these POPs as well as any intervening Core routing centers (OC-192, OC-48, etc.)

Describe any additional PE and/or Core routing capacity upgrades (new routing facilities, additional routers, upgrades to existing routers, etc.) for performance and redundancy planned for existing PE-POP's or Core routing centers. Indicate location and timeframe for activation.

Describe any planned additional or upgraded circuit connections interconnecting PE and/or Core routing centers. Describe circuit upgrades and indicate timeframe for activation.

Provide any additional relevant capabilities and features describing the redundancy, resiliency and routing capacity capabilities of PE and Core routers used in the POP's.

2.3 PE-POP to Customer Edge: Circuit Requirements and Characteristics

CTN-C requires that each participant be provided a PE – CE circuit that minimally provides bandwidth and QOS capabilities equivalent to or better than a standard DS1 circuit.

CTN-C prefers that each participant be provided a PE-CE circuit that supports 10 MB/sec connection speed and that provides reliability and performance characteristics that are underwritten by the Service Level Agreement (SLA) requirements listed in Section 2.14. CTN-C is aware that in many rural communities, such high capacity circuits are not available, or may only be provided at costs substantially greater than available under the State of California CalNet 2 pricing agreement. Nonetheless, CTN-C encourages Bidders to provide, where available, quotations for 10 MB/sec service, or for the maximum available, if less than 10 MB/sec.

NOTE: Additional quality points will be awarded on a per Participant site basis, for proposals that provide for the following desirable features:

1. 10 MB/sec connections
2. Adoption of the SLA terms and conditions listed in Section 2.14 for both 1.544 MB/sec service and for 10 MB/sec service.
3. Pricing for 10 MB/sec service equivalent to CalNet 2 MSA-1 and MSA-3 pricing.

For each participant location (or group of Bidder –designated equivalent participant locations) listed in Appendix C, provide the following information:

2.3.1.1.1.1 Bidder Response: (D) Availability of 10 MB/sec Service

- 1) Availability of 10 MB/sec service.

2.3.1.1.1.2 Bidder Response (M): PE-CE Circuit Requirements

Describe the CE – PE physical link. Include in the description

- 2) Proposed circuit type (e.g., DS1, nxDS1, DS3)
- 3) Number and location(s) of telecommunications CO's or dedicated circuit spans that comprise the link.
- 4) For private or dedicated circuit spans, provide the link circuit type and speed (e.g., fiber; packet over SONET, OC-3, Ethernet, etc.).
- 5) Where links between PE routers and CE routers are comprised of multiple circuits that are provided by two or more different telecommunications circuit providers, possibly extending across LATA boundaries:
 - a. Describe the intercarrier backhaul capacities and circuit characteristics.
 - b. Describe any “out of franchise” coordination issues or limitations.
 - c. Describe whether any segment of the connection is subject to inter-LATA tariffs and regulations and discuss any InterLATA issues or constraints.

2.3.2 Circuit Diversity and Upgrade Availability

CTN-C anticipates that certain locations may initially require a higher capacity circuit for PE-POP to CE connection, or after some period of operation, will require a circuit upgrade. Various

sites may require dialup or DSL remote access to support physician on call activities and other critical healthcare support activities. Dialup and DSL services shall be encapsulated via VPN. Bidder shall provide where available, dialup and DSL remote access services, as well as higher capacity circuits for PE-POP to CE connections.

2.3.2.1.1.1 Bidder Response (M): Circuit Diversity

For each CTN participant location (or group of Bidder-designated equivalent locations) listed in Appendix C designate as applicable, the availability of the following Bidder-provided circuit types:

1. Dialup VPN service
2. DS1 PPP
3. n x DS1 multilink PPP (and speeds supported)
4. Fractional DS3 PPP (10 MB/sec)
5. DS3 PPP
6. Cable modem access connections
7. DSL modem access connections
8. OC-xxx PPP (speeds supported)
9. Ethernet (speeds supported)

2.3.3 Alternative Physical Connection Modalities

CTN-C expects that certain locations within the state will not be adequately served by traditional ILEC/CLEC telecommunications services or terrestrial connection modalities that can provide the minimum required circuit services (DS1 service). CTN-C prefers network architecture and associated Contractor services that can accommodate alternative physical connection modalities for such sites. Such modalities potentially include:

1. Satellite
2. Microwave
3. Cable data service
4. WiMax cellular data service

CTN prefers that CTN participants that cannot be adequately served by standard ILEC/CLEC telecommunications services, be connected to the CTN by an alternative physical connection modality. Alternative connections shall meet the following requirements:

1. Bandwidth equal to or better than the minimum required bandwidth for the standard CTN landline connection (DS1 service or better, as described in Section 2.3).
2. Directly integrate into the CTN IP-VPN and provide all features and services available to landline-connected CTN participants.
3. Support IP addressing, subnetting, etc., identical to CTN participants with standard landline connections.
4. No component of the communications link shall transit the public Internet.
5. Support the CTN delineated end-to-end QOS requirements.
6. Reliability equivalent to a landline service.

7. Service supported by SLA's equivalent to SLA's provided for the standard landline service.
 - a. NOTE: CTN-C recognizes that for certain alternative connection modalities, fundamental physical constraints on signal propagation time and other factors may limit Contractor's ability to offer completely equivalent SLA terms.
8. Minimal or no infrastructure expense billable to CTN-C in order to extend backhaul services to a connection point to the CTN (e.g., microwave towers, repeater stations, etc.).
9. Small form factor for externally mounted communications equipment required at the CTN participant site.
10. Capability to rapidly deploy and provision the communications equipment.
11. Minimal constraints imposed by local topography (e.g., mountain ranges, adjacent tall buildings, dense forest).
12. Minimal or no internal or external facilities structural modifications required to mount the communications equipment at the CTN participant site.
13. Service provided as a managed service, as specified in Section 2.11 of this RFP.

NOTE: Additional quality points will be awarded for the capability to provide cost-effective circuit services through alternative physical connection modalities.

2.3.3.1.1 Bidder Response (D): Alternative Connection Modalities

For each CTN participant listed in Appendix C, or group of Bidder-designated equivalent participants, describe the availability of Bidder-provided circuit services through Alternative Physical Connection Modalities. Discuss each of the desired capabilities listed above.

2.3.4 Dynamic Bandwidth Allocation

CTN-C prefers the capability to dynamically adjust bandwidth available to each participant connection. The following desirable capabilities are requested:

1. Installation of a high-cap circuit that is normally provisioned at a fractional rate (e.g., 1xDS1 PPP over DS3).
2. Customer activated online request for higher bandwidth.
3. One hour or less response time for activation of the requested higher bandwidth.
4. Maximum Contractor-required burst period of 24 hours or less.
5. Provisioning on a site-by-site basis; i.e., no requirement for provisioning at all sites on the VPN.
6. Capability to limit authority to approve bandwidth burst at CTN participant sites to the CTN-C or their designate.
7. Monthly circuit charge for the fractional service with burst capability to that approximately equivalent to a natively provisioned service (e.g., charge for 1xDS1 PPP over DS3 service approximately equal to native DS1 service).
8. Minimal or no aggregate service charge for provisioning the service to the CTN VPN.

NOTE: Additional quality points will be awarded for the capability to provide a customer-controlled Dynamic Bandwidth Allocation service.

2.3.4.1.1.1 Bidder Response (D): Dynamic Bandwidth Allocation

For each CTN participant listed in Appendix C, or group of Bidder-designated equivalent participants, describe the availability of customer-controlled dynamic bandwidth allocation.

NOTE: Include in the description here, the desired technical and management capabilities listed above. Bidders will provide the cost information in the Cost Reporting Summary Section of this RFP.

2.3.5 Physical and Logical Diversity

CTN-C requires that the proposed network architecture shall provide the capability to support physically diverse, redundant CE to PE POP connections, subject to the following availabilities:

1. Physically separate PE-POP's within the local geographic region.
2. Physically separate circuit paths to geographically distinct PE-POP's.
3. Availability of Alternative Physical Connection Modalities, as describe above.

Such path diversity will not routinely be implemented, but may be desirable at specific locations where critical patient care activities regularly are supported (e.g., rural hospital with a Critical Access Emergency Department).

Contractor shall provide such diversity services where geographically available and technically practical within the proposed architectural design parameters.

2.3.5.1.1.1 Bidder Response (M): Physical and Logical Path Diversity

Describe the logical as well as the physical path diversity capabilities of the network architecture that will support the CTN. Include in the discussion, consideration of the following questions regarding network characteristics and diversity availability.

1. Can multiple PE-POP's (where available in a particular region) be logically diverse? (i.e., can redundant OSI Level 1 transport paths from a single CTN participant facility to multiple PE POP's be logically supported?)
2. Can load sharing be implemented between two physically diverse CE – PE-POP connections?
3. Can physically diverse redundant CE paths provided by “out of franchise” providers to separate contractor PE-POP's be logically supported?
4. Can diverse interLATA CE paths to multiple PE-POP's be supported?
5. Is diversity at the router port level supported within a given POP?
6. Is router diversity supported within a given POP?

For each participant location (or group of Bidder-designated equivalent locations) listed in Appendix C, describe the availability CE – PE-POP physical and logical diversity.

2.3.6 Resiliency and Load Balancing

CTN-C requires that the CTN physical network architecture and associated routing processes provide resiliency and load balancing capabilities. In the event of a failure of a PE-POP to Core link, or Core – Core link failure, the network shall rapidly redirect CTN traffic through redundant links. The network shall detect link congestion events and load balance CTN traffic over multiple links to preserve throughput and QOS.

2.3.6.1.1.1 Bidder Response (M): Dynamic Load Balancing

Describe how the proposed network dynamically manages load balancing.

In the event of degraded link performance or link failure, will traffic be rerouted to alternative links? What time period will elapse before link readjustments stabilize?

2.4 Routing and Commodity Internet Segmentation

CTN-C requires that CTN network traffic will be preferably, physically segmented (i.e., segmented at OSI Level 1) or minimally, logically segmented from commodity Internet traffic on Contractor's Core network. In the event that CTN traffic shares common physical links with commodity Internet traffic, CTN traffic shall receive routing priority.

NOTE: additional quality points will be awarded for network infrastructure design that provides physical segmentation of Commodity Internet traffic.

2.4.1.1.1.1 Bidder Response (D): Physical Segmentation of Internet Traffic

Describe whether CTN network traffic will be physically segmented or logically segmented from Commodity Internet traffic, as described above.

2.4.1.1.1.2 Bidder Response (M): Preferential Routing of CTN Network Traffic

Describe how CTN network traffic will be segmented from and routed preferentially from Commodity Internet traffic.

Will the CTN network traffic share PE and/or Core routers with commodity Internet traffic?

Will the CTN network traffic share Core network circuits with Commodity Internet traffic?

CTN RFP #2008-001

Describe any traffic engineering features that will be employed to isolate and prioritize CTN traffic, as well as preserve QOS.

Discuss route flapping over Internet links & its effects on CTN traffic.

If CTN Network traffic shares common backbone circuits or Core routers with Commodity Internet traffic describe QOS profile distinctions between CTN BE-grade QOS traffic and Commodity Internet traffic.

2.5 IP Addressing Plan

Unless otherwise stated, all references to IP addresses refer to IP version 4 (IPv4).

2.5.1 Capacity and Interoperability

Contractor shall design and deploy an IP address plan that provides the necessary capacity and flexibility to meet or exceed the following requirements:

1. Capacity to support a minimum of 1000 CTN participant sites
2. Capacity to support a minimum of 100 IP addresses per site
3. Capability to support Variable Subnetting (if appropriate).
4. Minimize or avoid conflicts with existing IP address plans currently employed within certain CTN Participant sites and/or RTN's and their connected sites.
5. Design that supports a "sparse matrix " address plan, permitting expansion of a CTN Participant IP Network Mask size without readdressing existing IP nodes at the participant site.
6. Obviates applying for an ASN and publicly routable Ipv4 IP address block(s).
7. As an alternative to proposing a private IP addressing, Bidder may propose to directly implement an Ipv6 address plan internally within the CTN. Until IPv6 becomes broadly supported through Internet routing, Bidder shall provide NAT services at all peering points with external networks.
8. Permit interoperable communication with external networks.

2.5.1.1.1 Bidder Response (M): IP Addressing Plan

Describe the proposed IP addressing plan. Include discussion of each of the listed requirements above as applicable

2.5.2 IP Version 6 Support

CTN-C intends to apply for an Autonomous System Number (ASN) and associated IP version 6 (IPv6) address assignment for future implementation. CTN-C will develop a strategic plan for IP

CTN RFP #2008-001

migration of CTN network infrastructure, Participant computing equipment and application upgrades to enable transition to Ipv6.

CTN-C expects that all computer and networking hardware deployed to support the CTN, as well as all associated services and applications will conform to the mandatory components of [USGV6] (or later version at CTN-C's option; see National Institute of Standards and Technology, Special Publication 500-267 (draft), Draft2-USGV6-V1.0, 23 January 2008). Contractor shall provide explicit details of non-conformance by any component along with a good-faith estimate of when the component will be fully conformant.

Contractor shall demonstrate comprehensive technical expertise and availability of services to support implementation of or transition to, an Ipv6 addressing plan.

If an Ipv6 addressing plan is proposed, include a discussion of the following:

1. Mitigation of problems associated with older clinical equipment, computing devices, operating systems and applications that are not Ipv6 capable.

2.5.2.1.1.1 Bidder Response (M): IPv6 Support

Describe the capabilities of Bidder's network and associated communications equipment to support IPv6 addresses and associated routing.

Describe Bidder's conformance with USGV6 IPV6 specifications, as referenced above.

Describe Bidder's resources and capabilities to assist CTN-C in converting from a proposed IPv4 addressing scheme to an IPv6 addressing scheme, if applicable.

2.5.3 Preservation of Existing IP Addressing Plans

Certain CTN Participants currently maintain an existing IP addressing plan for their facility.

Certain RTN's and their connected Participant sites currently maintain an IP addressing plan for their group of facilities.

CTN-C requires that RTN's and individual Participants shall reserve the option to retain their current IP addressing plans within their internal networks. RTN's and individual Participants will also retain the option to convert their internal network(s) to a Contractor-assigned IP address plan.

Contractor shall establish an IP address plan with sufficient flexibility, together with complementary routing and NAT services, that will permit preservation of an existing IP address plan currently maintained by RTN's as well as individual Participants within their internal network(s), should they elect to retain their existing IP addressing plan.

The proposed IP address plan, together with complementary routing and NAT services, shall provide all network services and that are available to RTN's and Participant sites that are natively addressed under the proposed IP address plan, to all RTN's and Participant sites that elect to retain their current internal IP addressing plan.

2.5.3.1.1.1 Bidder Response (M): IP Addressing and RTN's

For each Participant site listed in Appendix C (or groups of Bidder-designated equivalent sites) and for each RTN hub site listed in Appendix D (or groups of Bidder-designated equivalent hub sites), Describe the capabilities of the proposed IP addressing plan to support retention of existing IP addressing plans currently deployed by RTN's and individual Participant sites.

Indicate any network services, features or functions that would not be available, resulting from retention of an existing IP plan.

Describe any performance penalties associated with retention of an existing IP address plan (possibly due to employment of NAT services, etc.).

2.5.4 Network Address Translation (NAT)

2.5.4.1.1.1 Bidder Response (M): Network Address Translation

Does Bidder propose to employ NAT services for the purpose of providing routed communication by privately addressed, or IPV6 addressed nodes within the CTN with external networks?

2.5.4.1.1.2 Bidder Response (M): NAT and Border Routers

If NAT will be employed, describe the ability to support NAT services on the Bidder's border routers. Include information and capabilities for each of the following:

1. Session level protocol support for:
 - a. Passive/active FTP
 - b. Session Initiation Protocol (SIP)
 - c. DNS
 - d. ITU H.323 protocol
2. "Overloaded" NAT
3. Source NAT
4. Destination NAT
5. Static and Dynamic NAT
6. Support for tunneling protocols (IPsec)
7. IETF RFC 3022 and 4008 compliance

2.5.5 Externally-routable IP addresses

Contractor shall as applicable, provide sufficient externally routable Ipv4 addresses to support external IP communications by CTN participants.

2.5.5.1.1.1 Bidder Response (M): IP Addressing and External Communications

Describe the provisioning for CTN external IP communications. Discuss the following:

1. Availability of externally routable Ipv4 address block(s).
2. Number of simultaneous connections supported.
3. Whether IP address block(s) will be dedicated to CTN.
4. Availability of Static IP addressing for selected nodes.

2.6 IP Routing and Routing Equipment

2.6.1.1 IP Routing

CTN requires an IP-routed network consistent with the following characteristics

1. Unique IP addressing for each participant
2. OSI Level 3 routing that supports CTN peer-to-peer communications and communications with external networks.
3. Routing protocol: MPLS (with BGP route redistribution) or equivalent.
4. Ability to support IP connection with external networks
5. NAT services as necessary available at peering points for interoperable external communications.
6. Ability to support RFC 2475-compliant any-to-any IP VPN with associated dedicated and optimized routemap infrastructure in Contractor's Core Network.
7. Traffic engineering capabilities to optimize link traversal as well as to reroute traffic during congestion or link failure events.
8. Interoperate with external networks through summarized route advertisement and distribution with industry-standard EGRP's (e.g., BGP4) and IGRP's (e.g., OSPF).

2.6.1.1.1.1 Bidder Response (M): IP Routing Protocol

Describe the proposed IP routing protocol. Address each of the requirements listed above.

2.6.1.2 CE Router Equipment

Bidder shall specify, acquire, install, program and maintain a Customer Edge (CE) router at each CTN Participant site, for the purpose of providing IP routed connectivity from the site to the CTN.

The router shall provide the following capacities and capabilities:

CTN RFP #2008-001

1. Segmentation and isolation of an existing internal IP network operating at a participant site from the CTN.
2. Support for the following network connection modalities:
 - a. WAN connections
 - i. DS1 (installed router capacity for 2 circuits)
 - ii. NxDS1 multilink PPP (upgradeable router capacity for 4 circuits)
 - iii. DS3 (upgradeable router capacity for 1 circuit)
 - b. Local Network connections
 - i. 100 MB/sec Ethernet (installed capacity for 1 circuit)

2.6.1.2.1.1 Bidder Response (M): CE Routing and Communications Equipment

For each Participant location listed in Appendix C (or group of Bidder-designated equivalent locations) describe the routing and associated telecommunications equipment that will be installed at each Participant location. Address each of the requirements listed above, as appropriate. In addition, include:

1. Equipment brands and model #'s
2. Approximate equipment size, including any Contractor-provided mounting infrastructure.
3. Power requirements
4. Approximate BTU heat load dissipation requirements
5. Requirements regarding proximity to telecommunications circuit demarcation points within customer premises.

2.6.1.3 Ancillary Router Services

CTN requires that the router at each participant site either be equipped with the following capabilities, or through optional software/hardware upgrades, be made capable of providing the following services..

1. Network Address Translation services between an internal IP network operating at a participant site and the CTN CE-PE interface.
2. Dynamic Host Configuration Protocol (DHCP) support for:
 - a. Hosts at a site that operates internally under the assigned CTN IP subnet.
 - b. Hosts at a site that operates internally under an IP addressing plan that is distinct from the assigned CTN IP subnet
3. "Out of Band" management capability, for remote maintenance and problem resolution, in case of interrupted remote access through the primary CE-PE circuit.
4. CTN-C prefers that CE routers be configured to interconvert IP QOS tags (MPLS-COS or DSCP IP-TOS) with IEEE 802.1p Datalink security/QOS tags, for the purpose of distributing frame-level delineated QOS within an internal Ethernet LAN.

2.6.1.3.1.1 Bidder Response (M): CE Router Capabilities

Describe the capabilities of the proposed CE router to meet or exceed the requirements listed

above.

2.6.1.3.1.2 Bidder Response (D): CE Routers and IP QOS to IEEE 802.1p

Describe the capabilities of the router to provide the optional IP QOS to IEEE 802.1p interconversion capability.

2.6.1.4 Supported Network Traffic Types

CTN-C requires that the routing protocol and associated CTN network services fully support the following network protocols and services:

1. Multicast Services
2. H.323 and SIP Session management protocols.
3. DICOM, HL7 session-level data interchange protocols.

2.6.1.4.1.1 Bidder Response (M): NAT and Session Level Protocols

Describe how Bidder's routing protocol and associated network services fully support the required services listed above. If NAT services will be deployed, describe the capabilities to support session-level protocols such as H.323 and SIP that are known to be particularly susceptible to NAT-related misconfigurations.

2.7 Regional Telehealth Network (RTN) Integration

2.7.1 Overview

The CTN will connect with certain existing RTN's that are geographically distributed throughout the state (for additional descriptive information regarding RTN's that are currently designated to participate in the CTN, see the CTN RHCPP Proposal, Section 9, page 53). In addition, CTN-C may elect to establish connections to additional RTN's and other regional networks in future. Consequently for purposes of responding to this RFP, the term "RTN" shall be interpreted to generally mean, any small, regional network (< 100 IP nodes distributed over twenty or less discrete sites) to which CTN-C may currently or in future, establish network connections.

2.7.2 RTN Connection Topologies to CTN: Hub-and-Spoke or Individual

Bidder shall consider two alternative designs for connection of an RTN to the CTN:

CTN RFP #2008-001

1. Connection of the RTN through one or more existing RTN hub site(s) using a single, higher bandwidth PE-CE connection at each hub site, of sufficient capacity to accommodate the anticipated aggregate traffic load from all the RTN participant sites.
2. Direct connection of each existing RTN participant site directly to the CTN, as well as independent connection of RTN hub sites to the CTN.

Determination of which alternative will be applied to a particular RTN will be made during the Planning Phase of CTN implementation.

For purposes of responding to this RFP, Bidder shall discuss the capabilities of the proposed network architecture and associated IP addressing plan in supporting each of the alternative connection topologies.

Appendix D provides RTN Hub and RTN Participant site information regarding certain RTN's to which CTN-C shall establish connections. In the Cost Section of the RFP response, Bidder shall provide explicit quotations for connection of each of the listed RTN's in Appendix D, including cost quotations for each of the two connection topologies described above.

For the purposes of describing the capabilities of the proposed network design in this Section, Bidder shall consider the list in Appendix D from two perspectives:

1. Designation of specific RTN's to which CTN-C shall establish connection during the three-year implementation phase of the project.
2. Examples of the network architectures that Bidder shall demonstrate can be accommodated within the proposed CTN network architectural design, IP addressing plan and associated network services (e.g., NAT).

2.7.3 RTN Connections: Designation of Responsibilities

Under those circumstances where RTN's retain their existing internal network infrastructure, RTN and Contractor respectively, shall assume the following technical responsibilities:

2.7.3.1 RTN Responsibilities

1. IP address assignment of individual internal nodes.
2. Design, installation, maintenance, troubleshooting and repair of all internal routing, switching and associated equipment.
3. Ordering, provisioning, cutover, maintenance, troubleshooting and repair of all internal circuits and circuits that interconnect RTN participant sites with RTN regional hub(s).
4. Installation, programming, maintenance, troubleshooting and repair of circuits and equipment that connect the RTN to the CE equipment.
5. Internal router maintenance and programming, including establishing internal routes and access control lists that are compatible with CTN routing requirements.
6. Provisioning of RTN routing/switching equipment to support delineated QOS, consistent with CTN QOS requirements.

2.7.3.2 Contractor Responsibilities

Contractor responsibilities in connecting RTN's shall minimally include:

1. Provide and provision PE-CE circuits and associated CE equipment.
2. Install, program, cutover and maintain CE equipment at the RTN hub site CPOE.
3. Provide IP address blocks with appropriate subnet organization that are sufficient to address each RTN participant location, if RTN elects to be internally addressed under the CTN IP address plan.
4. Provide NAT services as necessary on the Contractor-provided CE router that provide full IP interoperability between all RTN participant nodes and the CTN.
5. Establish router access control lists on the RTN CE router as necessary to prevent route loops and other routing incompatibilities between RTN and CTN, taking proper account of any existing RTN-ISP connections.
6. Provision a PE-CE circuit with sufficient bandwidth capability to maintain QOS and that provides aggregate throughput sufficient to support the combined traffic load from the RTN participant sites.

Under those circumstances where each individual RTN participant site is directly connected to the CTN, Contractor assumes the technical responsibilities equivalent to those associated with connecting independent Participant sites.

2.7.4 Individual Connections

2.7.4.1.1.1 Bidder Response (M): RTN Participants and Direct CTN Connection

In Section 2.3 of this RFP, Bidder is requested to provide a technical proposal for individual PE-CE connections to each CTN Participant listed in Appendix C, which also includes all CTN participants that currently participate in an RTN. In this section, for each CTN participant that currently participates in an RTN, or group of equivalent Bidder-designated participants, discuss any technical issues, limitations, or feature constraints that Bidder's proposed network architecture will impose on RTN participants resulting from replacement of their connection to an RTN-RH with a direct connection to the CTN.

2.7.5 RTN Hub-and-Spoke Connections

2.7.5.1.1.1 Bidder Response (M): Preserving RTN Hub and Spoke Architecture

For each of the RTN's listed in Appendix D (or Bidder-designated group of equivalent RTN's), describe the capabilities of the network architectural design and the IP Addressing Plan, in supporting the topological alternative of connecting each RTN to the CTN through a single

CTN RFP #2008-001

connection to an existing RTN hub site. Address each of the designated Contractor responsibilities listed in Section 2.7.3.2.

Describe any degradation or loss of features, performance, reliability that might result from implementation of Bidder's network architecture under the Hub-and Spoke design alternative.

2.8 Quality of Service and VPN Requirements.

The CTN will be used to transact critical patient care activities via telemedicine. Many of these transactions will entail the use of videoconferencing equipment, as well as real-time evaluation of patient monitoring equipment at participant sites. In addition, the CTN will be used to support lower priority administrative, educational and research activities. Consequently, the CTN must possess several capabilities relating to assignment of an explicit (delineated) Quality of Service (QOS) designator to high priority network traffic:

1. End-to-end explicit packet-level QOS: network traffic marked with a QOS designation must receive preferential routing within the CTN VPN, as well as preferential routing throughout Provider's RH and Core Network infrastructure.
2. The CTN will connect to other networks that may currently, or in future provide QOS capabilities. CTN must possess the capability to interchange explicit QOS designations with such networks.
3. Initially, CTN will require at least one level of expedited QOS. The network will soon become used for additional types of traffic that require higher priority: 1) governmental functions; 2) emergency preparedness and disaster response functions. Consequently, CTN requires that additional levels of QOS designation be available for future implementation.

Bidder shall support explicit, packet-level QOS designation and end-to-end preferential routing capabilities described in items 1 – 3 above.

2.8.1.1.1.1 Bidder Response (M): Delineated Quality of Service Capabilities

Describe the capabilities for explicit, packet-level QOS designation and end-to-end preferential routing. Include a description of each available class of delineated QOS available.

Describe whether QOS designations are recognized and appropriately prioritized in Contractor's Core network.

As applicable, describe the supported classes of MPLS-COS QOS levels of priority associated with DSCP classification levels: EF, AF41, AF31, AF21, AF13, 0 (BE).

Describe any additional QOS classes of service that are available within the Contractor's network.

Describe the QOS provisioning that is associated with each QOS classification level. Discuss with regard to (policing, marking, drop eligibility, egress/ingress queuing, etc.).

Provide metrics that quantify the relative performance enhancements that can be expected for QOS-tagged traffic. Include specific representations of end-to-end circuit integrity with respect to:

CTN RFP #2008-001

1. Packet loss
2. Out-of-Sequence Packet delivery
3. Latency and jitter

In order to extend QOS provisioning beyond the CE router interface into a CTN participant's switched Ethernet internal network, describe whether IP-based QOS designations can be propagated into IEEE 802.1p 3-bit QOS frame tags.

Describe support for propagation and/or interconversion of MPLS-COS or DSCP QOS tags at connecting or peering points with external networks. Discuss each of the following possible interconversion types at a peering point:

1. Egress to an MPLS network supporting MPLS-COS
2. Ingress from an MPLS network supporting MPLS-COS
3. Egress to a BGP4 or OSPF routed IP network supporting DSCP
4. Ingress from a BGP4 or OSPF routed IP network supporting DSCP

2.8.2 CTN Traffic Segmentation and VPN Encapsulation

Since the CTN will be used to communicate sensitive patient care related information, the network architecture must provide a high level of security.

CTN-C requires any-to-any VPN based network security. In the MPLS environment, this is provided by IETF RFC 2547-compliant any-to-any VPN. Since ad hoc interchange of sensitive patient care information may occur among any CTN participants, it would be administratively burdensome to manually establish point-to-point VPN's. Any-to-any VPN capability must therefore be an intrinsic capability of the network architecture. Capabilities for extension of VPN secure links to external networks via IPsec must be provided.

Bidder shall provide VPN-based traffic segmentation and security for the CTN. VPN services shall provide the following capabilities:

1. IETF RFC 2547-compliant Any-to-Any IP VPN (or equivalent)
2. Capabilities to extend VPN segmentation at connection or peering points with external networks.

2.8.2.1.1.1 Bidder Response (M): Virtual Private Network Capabilities

Describe the proposed VPN technologies that will be employed in order to secure CTN network traffic. Include descriptions of each of the following capabilities:

1. CTN requires that all internal CTN traffic among CTN participant sites be rendered secure via VPN encapsulation. Describe the ability to provide RFC-2547-compliant any-to-any IP VPN (or equivalent) support.
2. CTN requires the capabilities to establish VPN connections to systems external to CTN. Describe the capabilities to support external VPN-encapsulated sessions.

CTN RFP #2008-001

3. Assuming CTN-C elects to connect RTN participants via a hub-and-spoke topology, describe the capabilities to provide VPN encapsulation for aggregated traffic from RTN Hubs.
4. Describe the availability of encryption services within VPN support.

2.9 Managed Firewall / IPS and Web Filtering Services

2.9.1 Firewall / Intrusion Prevention System Services

CTN requires that Contractor shall supply a Managed Firewall/intrusion Prevention Service that protects the confidentiality, availability and integrity of highly sensitive CTN patient care-related network services, computing systems and data repositories from external network threats. The System must be physically or logically interposed between internal CTN traffic and all external traffic sources at every connection and peering point with an external network (“external networks” do not include RTN’s).

NOTE: provision of a managed firewall service is a mandatory requirement for the purposes of submitting a responsive proposal. CTN-C retains the right to elect not to contract for this service.

Bidder shall provide firewall/IPS services that include:

1. Firewall / IPS hardware and software acquisition and installation
2. Hardware and software upgrades and maintenance.
3. Monitoring and management of firewall/IPS system operations, including
 - a. Real-time 24 x 7 threat surveillance
 - b. Issuing customer alerts
 - c. Detecting, initiating mitigation efforts and resolving network breaches.
4. Recommending security upgrades to CTN Participants.
5. Coordinating security mitigation activities with designated CTN technical staff.
6. Providing regular reports detailing network activity, including significant incursion attempts and other malicious activities.
7. Provide industry-standard protection for common network access threats, including but not limited to the following:
 - a. Denial-of-Service attacks
 - b. IP spoofing
 - c. Virus, Spyware, Malware, Identity Theft
 - d. Vulnerabilities in vendor products
 - e. Network Reconnaissance
 - f. Exploits
 - g. Peer-2-Peer, Instant Messaging, Streaming Media

2.9.1.1.1.1 Bidder Response (MO): Managed Firewall / IPS

Describe the managed firewall/IPS services that will be provided. Discuss each of the requirements listed above.

2.9.2 Commodity Internet Access Management

CTN-C is mandated by the FCC RHCPP Order to maintain the CTN as a “dedicated healthcare network”. Contractor shall provide at least two modes of regulating access to Commodity Internet resources by CTN Participants. CTN-C shall have the right to select which mode will initially be employed. During the course of the Contract and after appropriate notification of Contractor, CTN-C shall have the right to modify which mode of regulating Commodity Internet access is employed. The following two modes of regulation shall be made available:

Blocking Commodity Internet Access

Contractor shall provide a means of completely blocking Commodity Internet access through connections to external networks.

Contractor shall employ router Access Control Lists (ACL’s) on all border routers, or other effective means to restrict access.

On a schedule jointly agreed upon by CTN-C and Contractor, CTN-C will provide Contractor with a list of ASN’s and associated IP address blocks to which CTN Participants require access (e.g., University of California Medical Centers). ACL’s and/or other blocking technologies shall be superseded by the establishment of enumerated routes or other technologies on all border routers, such that access to the required external entities is enabled.

2.9.2.1.1.1 Bidder Response (M): Internet Blocking

Describe the Public Internet blocking capabilities provided.

Describe Bidder’s capabilities to dynamically update and refine an exception list of external networks to which CTN Participants may require access.

Describe the administrative process and customer support services that Bidder will provide to facilitate establishment, maintenance and updating of an exception list.

2.9.2.2 Web Content Filtering Services

In the event that CNT-C elects not to totally block access to Commodity Internet resources, CTN-C requires that Contractor shall provide an effective means of blocking extraneous or deleterious Web traffic to/from external networks and to the public Internet. Such capability shall be provided as a managed service.

The Web content filtering managed service shall provide CTN-C with the option of requesting from the managed service that certain ingress and egress Web traffic shall be blocked. Such

CTN RFP #2008-001

content filtering service shall minimally include the capability to block traffic to/from sites purveying the following types of content:

1. Pornography
2. Movies & Videos
3. Peer-to-Peer File Sharing (e.g., bit-Torrent)
4. Shopping , Finance, general News (e.g., Yahoo, MarketWatch, Amazon)
5. News, Sports and Entertainment (e.g., ESPN, NBA, WFL, Entertainment Tonight)

NOTE: provision of a managed Web content filtering service is a mandatory requirement for the purposes of submitting a responsive proposal. CTN-C retains the right to elect not to contract for this service.

2.9.2.2.1.1 Bidder Response (MO): Web Content Filtering

Describe the proposed Web content filtering managed service. Discuss the capabilities to control access to the types of sites listed above.

2.10 Network Monitoring and Status Reporting

CTN requires that Contractor shall provide a centralized network monitoring service that will comprehensively monitor the CTN on a 24 x 7 x 365 basis. CTN requires that Contractor provide sophisticated capabilities for real-time monitoring of performance and utilization levels for all segments of the Contractor-supplied network infrastructure. Scope of monitoring should extend to the CE router at each Participant site and each RTN Hub site. The monitoring service shall provide the following capabilities and services:

1. SNMP monitoring of all active network devices serving the CTN.
2. Operate a 24x7x365 monitoring facility, properly equipped and staffed to identify and mitigate network faults and failures throughout the entire CTN.
3. Comprehensive performance monitoring capabilities that extend to each CTN CE router.
4. Comprehensive performance monitoring capabilities that track availability and performance of network links at CTN connection and peering points with external networks.
5. Regular periodic reporting to CTN-C and individual CTN Participants as appropriate, for network performance and reliability.
6. Customer-accessible, real-time, Web-based services that provide comprehensive network status information.
7. Customer-accessible, Web-based problem reporting facilities that support problem ticket generation, problem ticket status updates and problem resolution notification.
8. Resource utilization reports that document Participant usage in industry-accepted metrics.

Bidder shall provide a comprehensive network monitoring service that will provide the capabilities listed above.

2.10.1.1.1 Bidder Response (M): Network Monitoring

Describe the comprehensive network monitoring capabilities that will be provided. Describe support for each of the required capabilities listed above.

Provide sample copies of representative CTN network monitoring and network usage reports that CTN-C and Participants can access online, or that will be provided via other means.

2.10.2 Customer-Accessible Monitoring

CTN-C may in addition to Bidder-provided network monitoring services, establish separate monitoring facilities that will require access to online, real-time CTN network performance and status data, in industry-accepted, standardized format. Availability of real-time monitoring data shall minimally comprise the following:

CTN RFP #2008-001

1. SNMP data streams, including online access to SNMP status information for the following equipment and circuit elements:
 - a. CE routers
 - b. CE – PE POP circuits
 - c. CTN circuits and border routers providing connections to external networks.

2.10.2.1.1.1 Bidder Response (M): Customer-Accessible Network Monitoring

Describe the online, customer accessible performance and status data as listed above that will be provided.

In addition to the required access to the online status data listed above, indicate to which components of Contractor's PE-Core and Core-Core backbone infrastructure, CTN will be granted access to online status data feeds.

2.11 Managed Equipment

CTN-C shall contract for a managed network in which all the required communications and associated network equipment (routers, CSU/DSU, firewall, modems, etc.) are provided by Contractor as part of a managed network service. The managed equipment service shall minimally include the following equipment items:

2.11.1.1 Equipment Provided

1. Network hardware and software residing at the following locations:
 - a. CE router and associated equipment at Participant locations, including any “out-of-band” equipment and circuits required to service and troubleshoot the primary communications equipment.
 - b. PE-POP equipment sited at physical Regional Hubs (if applicable)
 - c. Core routers and associated equipment, as applicable to CTN.
 - d. Border routers and associated equipment at connecting and peering points with external networks
2. Firewalls, Intrusion Prevention Systems and all associated hardware, software and services.
3. Web content filtering equipment, software and support.
4. Network monitoring equipment, software and monitoring service.

Managed equipment service shall minimally include the following services:

2.11.1.2 Managed Equipment Services Provided

1. Installation
2. Programming and revision updating
3. Troubleshooting
4. Equipment, software and programming Updates and Repairs
5. Circuits and equipment associated with out-of-band management of managed network equipment.

As part of a Managed Network Service, Bidder shall provide all network equipment, software, circuits and associated services, as itemized under “Equipment Provided,” and under “Managed Equipment Services Provided,” above.

2.11.1.3 Managed Equipment – Purchase Option

Contractor shall provide CTN-C the option to purchase certain managed equipment under the following circumstances:

1. CTN-C elects to discontinue a managed equipment service for all or part of the networking equipment currently deployed in the CTN.

2. At the terminus of the Contract resulting from this RFP process.

Contractor shall sell the selected items of equipment to CTN under the following terms:

1. Depreciated value, based upon depreciation schedule mutually acceptable to Contractor and CTN-C and included in the Contract terms.
2. Item pricing and depreciation schedule shall be established based upon the date that equipment was first placed into service in the CTN.
3. Original per-item purchase price established by one of the following pricing standards (first-to-last priority order):
 - a. Pricing available under CalNet 2.
 - b. Pricing available under the State of California CMAS Program.
 - c. Pricing available to the University of California under a system-wide pricing agreement.
 - d. Manufacturer's retail price
4. Other terms as mutually agreed by Contractor and CTN.

Purchase option shall apply to the following equipment items:

1. CE routers and other communications equipment (e.g., CSU/DSU's, modems) physically installed at CTN Participant locations.
2. PE routers and other associated communications equipment if they are installed at a hub site dedicated to CTN support, or if the equipment is installed at a CTN Participant location that serves as a hub site for the CTN.
3. Firewall equipment if it is installed at a hub site dedicated to CTN support or if the equipment is installed at a CTN Participant location that serves as a hub site for the CTN.

2.11.1.3.1.1 Bidder Response (M): Managed Equipment Service

Describe the proposed Managed Equipment Service. Include descriptions of the provision for each of the required equipment items and associated equipment maintenance services itemized under sections "Equipment Provided" and "Managed Equipment Services Provided" above.

2.12 Connecting and Peering With External Networks

Essential functions of the CTN are to provide the following services for its participants.

1. Distance Education – provide online clinical training, educational updates and informational seminars that are prepared and presented by leading authorities in their clinical fields.
2. Specialty Consultation via Telemedicine – provide services for rural physicians to schedule for their patients, real-time medical consultations with physician specialists located at regional referral centers (e.g., UC Davis Health System, Sacramento California).
3. Health Information Exchange (HIE) access – an HIE is defined as the mobilization of healthcare information electronically across organizations within a region or community. CTN-C will participate in the development of a statewide HIE that will permit interchange of patient records among its participants.
4. Teleradiology – CTN will be used to transmit radiographic studies to remote PACS systems (Picture Archive and Communications Systems) where they will be stored and distributed to radiologists for expert interpretation.
5. Real-time patient monitoring – telemetry from patient monitoring equipment will be transmitted in real-time to remote facilities for monitoring and evaluation by physician intensivists and other acute care specialists.

Access to many of the required services and referral specialists can only be obtained by accessing networks external to the CTN. Consequently, CTN-C requires that the CTN connect or peer with external networks where these services reside.

In order to provide for medical grade interoperability with the external networks for the purposes of supporting critical patient care functions, it is essential that connection and peering modalities maintain quality, security and reliability metrics established for the CTN.

Bidder shall provide as a managed service, connection and/or peering services to external networks. Service shall include the following:

1. Network design for interconnection.
2. Acquisition, programming, installation, testing and maintenance of any required routing and communications equipment hardware and software.
3. Specification, ordering and provisioning of interface circuits.
4. In consultation with CTN-C, coordination of design, installation and maintenance activities with the appropriate technical and administrative groups within the external network.
5. Connection and Peering interfaces shall preserve the following CTN quality and security requirements.
 - a. End-to-end delineated QOS. Interfaces to external networks shall propagate QOS tags on ingress and egress traffic, providing any required conversions required to maintain equivalency of DSCP provisioning.

- b. IPSec extension of VPN to external networks. Provisions shall be available to extend the internal CTN VPN through IPSec encapsulation.
 - c. Firewall/IPS Services – firewall/IPS services shall be provided that monitor each connection/peering point and that provide industry-standard protection from malicious traffic.
 - d. Public Internet Blocking – Contractor shall provide the capability to block or filter ingress/egress traffic from the public Internet, if accessible through the external network.
6. Provision for ASN and associated externally routable Ipv4 address blocks that may be necessary to enable CTN IP communications with external networks.
 7. Network Address Translation shall be employed as necessary at all connection/peering points in order to permit seamless communications with the external network.
 8. No segment of the connection or peering network infrastructure shall transit the public Internet.
 9. In consultation with CTN-C and external network representatives, Contractor shall determine the optimal connection type, geographic locations for physical connection and bandwidth required.
 10. Routing – Contractor shall maintain the appropriate route tables on CTN routers in order to permit access to external networks by all CTN participants. Contractor equipment shall appropriately advertise routes to external networks in order to permit external networks to communicate with the CTN.
 11. 24x7 monitoring, problem identification and problem resolution for network infrastructure and circuits associated with external network connections.
 12. For purposes of responding to this RFP, Bidders shall propose a technical design and provide associated cost quotations for installing and maintaining an OC-3 circuit connection between the CTN and each of the external network(s), as required.
 13. Bidder will not be responsible for any administrative or other coordination activities related to enrolling, registering or qualifying CTN for participation in external networks or for obtaining authorization for access to external networks. Bidder will not be responsible for processing of invoices for, or for payment of, any membership or other administrative fees not directly associated with network provisioning and maintenance, including, but not limited to: registration fees, annual subscription fees, usage fees or other participation fees levied by external networks.
 14. Bidder shall be responsible for appropriately invoicing USAC, CTN-C and other payers for provisioning, operation and maintenance of the network connections that provide access to external networks, according to the terms and conditions stipulated in Section 3 of this RFP.

2.12.1.1 External Networks

Contractor shall provide connections to the following external networks, meeting or exceeding the requirements listed above:

1. Corporation for Education Network Initiatives in California (CENIC)

CTN RFP #2008-001

- a. CENIC provides access to the University of California Medical Centers.
 - b. Information regarding the CENIC network may be found at the following URL:
<http://www.cenic.org/>
2. Internet2
- a. Information regarding the Internet2 Network may be found at the following URL:
<http://www.internet2.edu/>
 - b. Internet 2 management has provided the following language describing the requirements for connection to Internet2:

"Provide an Internet2 Network connection that enables full IP connectivity through the Internet2 backbone network to all Internet2-connected members, Internet2-connected international networks, Internet2-connected Federal Network (e.g., ESnet, DREN, etc), and other Internet2-connected national research and education networks."
3. National LambdaRail
- a. Information regarding the National LambdaRail Network may be found at the following URL:

<http://www.nlr.net/>

NOTE: Both the Internet 2 and National LambdaRail networks are accessible through the CENIC Network, which serves as National LambdaRail's California Regional Optical Network (RON) Affiliate. Contractor may simultaneously meet the requirements to provide connections to the three external networks by providing a single direct connection to the CENIC Network.

2.12.1.1.1.1 Bidder Response (M): Connections to External Networks

Describe the network infrastructure and services that Bidder will provide to enable CTN communications with each of the identified external networks. Address each of the requirements listed above.

2.13 Project Management Services

2.13.1 Joint Responsibilities

CTN-C and Contractor will be jointly responsible for effective implementation of the CTN project. CTN-C project management responsibilities are itemized briefly below. Contractor responsibilities are enumerated in the following section.

2.13.1.1 General CTN-C Responsibilities

The CTN-C has broad authority for oversight and management of the CTN RHCPP, particularly the Contract that will result from the award of this RFP. The CTN-C considers the best interests of the CTN as a whole when making decisions and determining its strategies. This includes focus on those policies and activities that emphasize the primary missions of the CTN, as outlined in the Introduction Section of this RFP (see also Introduction of the CTN RHCPP Proposal). These activities include, at a minimum:

1. Serve as the principal contact for all operational, financial and planning aspects of CTN project.
2. Serve as the principal review and approval authority for all operational, financial and planning aspects of CTN project.
3. Coordinate regular meetings and other means of communication with Contractor among CTN-C management, administrative and technical staff.
4. Coordinate communications and serve as principal liaison among CTN Participants, CTN-C and Contractor.
5. Continuous review of progress on project design and implementation milestones.
6. Contract management oversight to monitor effectiveness, and to audit Contractor adherence to Contract Requirements
7. Make decisions on Participant requests for approval for exemptions to standardized infrastructure installations or nonstandard operations.
8. Respond to service issues beyond the scope of the Contract
9. Perform periodic audits of CTN invoices to ensure accuracy based on the terms and conditions of the Contract and to ensure cost effectiveness of service selection for Participant application.

2.13.1.2 Contractor Responsibilities: Summary

Bidder shall provide comprehensive project management support and services throughout the Design and Implementation Phases of CTN development. Project management services shall include:

CTN RFP #2008-001

1. Dedicated Project Management Team.
2. Provision for personnel, equipment and logistics sufficient to support the CTN statewide project.
3. Capabilities to support multiple simultaneous implementation initiatives in order to maintain geographic equity.
4. Manage Contractor network design activities and coordinate design needs with CTN Technical Teams.
5. Comprehensive Participant Site Coordination staff and services:
 - a. CTN Participant site assessments
 - b. Coordination and management of all ILEC/CLEC activities
 - c. Equipment installation, circuit cutover and testing
6. Design, coordination and installation of all Connecting and Peering Points with external networks
7. Coordination of Network Monitoring service.
8. Coordination of Firewall/IPS design, installation and synchronization with other network implementation activities.
9. Regular communications and reporting on project status to CTN-C
10. Budgetary coordination and consultation with CTN-C
11. Regular monitoring and reporting of project status to CTN-C, using industry accepted project management methodologies.

Bidder shall provide comprehensive project management services, including as a minimum, the services and functions listed above.

2.13.1.2.1.1 Bidder Response (M): Project Management Resources

Describe the project management resources and services that Bidder will provide. Discuss each of the items listed in 1 – 11 above.

2.13.2 Dedicated Project Management Team

Contractor shall provide a dedicated Team that is responsible for management of all aspects of the CTN design and implementation phases of the project. The Team shall be minimally composed of the following individuals:

1. Project Manager – individual who has overall responsibility for all project components. All members of the Team administratively report the Project Manager. Due to the size and complexity of the CTN Project, Contractor shall assign a dedicated Project Manager with knowledge and experience in managing telecommunications projects of similar complexity.
2. Project Technical Lead – individual who is responsible for design of network architecture, preproduction testing, and technical problem resolution.
3. Project Financial Lead – individual who is responsible for organizing and coordinating financial records as they relate to the CTN project, including preparation of invoices, preparing and submitting financial reports to CTN-C, submission of properly organized

and formatted invoices and financial reports to USAC and other governmental funding agencies.

4. Lead Project Coordinator – individual who serves as the primary liaison between Contractor Team and CTN-C. Responsible for coordinating meetings, distribution of reports and other communications. Serves as a comprehensive communications resource, responsible for accurate, timely and reliable “many-to-many” communications among the various Contractor Team components, as well as multiple administrative, technical and financial entities within CTN-C.

2.13.2.1.1.1 Bidder Response (M): Project Management Team

Describe the proposed Project Management Team. Describe how the following project responsibilities are allocated among the Team:

1. Overall Project management
2. Technical Design
3. Statewide logistical support
4. Financial management
5. Administrative liaison with CTN-C

Describe the Statewide geographic distribution of key Project Team members.

Provide an Organizational Chart, including specific names and titles for key positions, including those specifically listed above.

2.13.3 Project Technical Design Process

Contractor shall provide oversight and coordination of network design activities. Through regular meetings and communications with CTN-C technical staff and management, Contractor shall coordinate network design activities, ensuring that the requirements established in this RFP are accurately reflected in the overall network design.

2.13.3.1.1.1 Bidder Response (M): Network Design Team

Describe the design team that will be assigned to the CTN Project. For each principal design team member, list:

1. Relevant industry-accepted certifications.
2. Experience on projects of similar scope.
3. Availability of Contractor Design Team throughout the project lifetime.
4. Physical facilities available to Contractor Design Team to prototype network designs.

Describe Contractor Design Team methodology, with particular emphasis on the processes and procedures employed for coordination with and validation by CTN-C to obtain an optimal design.

2.13.4 Geographic Scope of Proposal

CTN requires a network design and resulting services that encompass the entire statewide cadre of participants as designated in Appendices C and D of this RFP (see also, the CTN Proposal, Section 6-7), with demonstrated capabilities to accommodate substantial expansion in number of participant sites.

2.13.4.1.1.1 Bidder Response (M): Accommodating a Statewide Project

Describe Bidder's capabilities to accommodate a statewide project.

Describe existing staff, resources and physical facilities that will be available for timely engagement in CTN project activities.

Describe additional staff, resources and physical facilities that must be acquired.

Describe the approximate time that Contractor will require to assemble an effective implementation team of sufficient scope to engage in a statewide project.

2.13.5 Geographic Equity in Distribution of Participants

The CTN will be geographically dispersed throughout the entire State of California. The CTN RHCPP proposal presents a phased implementation of a minimum of approximately 100 participant sites per year over a maximum three-year period (see Section 6-7, page 28, CTN RHCPP Proposal). The methodology used for establishing this sequencing of connecting participants is based upon the CTN-C requirement to equitably distribute implementation efforts throughout the state on a geographic basis; i.e., no geographic area of the State will receive preferential priority, either with respect to resources expended or number of participants connected. CTN-C recognizes that many mitigating factors may influence the precise order of participant connection; however, Bidder's implementation plans will be required to demonstrate sufficient flexibility to accommodate ad hoc changes while adhering to the overall goal of maintaining geographic equity. Bidder's will be required to demonstrate that project management, technical and administrative staff and resources will be assigned to the project to a sufficient extent that a statewide implementation can be supported.

Geographic Segmentation of the State

CTN-C and Contractor will jointly discuss and develop an approximate geographic segmentation of the State of California for purposes of assessing Contractor adherence to the geographic equity requirement.

2.13.5.1.1.1 Bidder Response (M): Multiple Statewide Implementation Projects

Describe the capabilities of Bidder's technical design as well as availability of staff resources and services to accommodate a statewide project implementation.

Describe the capabilities of project management staff and resource to manage and coordinate a minimum of three simultaneous regional project implementation initiatives (Northern, Central and Southern California).

2.13.6 Defined Three Year Implementation Schedule

The CTN-C requires that Contractor commit to a three calendar year maximum implementation schedule beginning from date of Contract signing and subject to extensions due to circumstances beyond Contractor's control. Contractor shall meet the following minimum project milestones:

1. Design, installation, testing and activation of network connections to a minimum of 100 individual CTN Participant Sites per calendar year.
2. Network activations to be distributed on a geographically equitable basis each calendar year according to the following minimum allocation:
 - a. 25 in Northern California
 - b. 25 in Central California
 - c. 25 in Southern California
 - d. 25 (not specified)
3. Fully operational network comprised of a minimum of 300 participant locations at the end of three calendar years from date of inception of the project.
4. Design, installation, testing and activation of connections with the following networks during Year One calendar year:
 - a. National LambdaRail (NLR)
 - b. Internet 2
 - c. CENIC (access to UC participant campuses and clinics)
5. Design, installation, testing and activation of the following network services during Year One calendar year (contingent upon CTN-C election to contract for these services):
 - a. Firewall Services
 - b. Web Content Filtering Service
6. Design, installation, testing and activation of the following network Services within the first Three months of Year One calendar year.
 - a. Comprehensive Network Monitoring Service
 - b. Customer-accessible, Web-based network status service.
 - c. Customer Support Center for problem reporting and tracking.

2.13.6.1.1.1 Bidder Response (M): Adherence to Project Schedule

Describe Bidder's capabilities to adhere to a three-year implementation schedule as specified above. Address each of the listed implementation requirements.

2.13.7 Expanded Project Scope

CTN-C intends to expand the scope of the CTN to include additional Participants, based upon the following factors:

1. Availability of Funding
2. Actual project cost, as determined through this RFP process.
3. Total Number of eligible prospective Participants who wish to join the project.

4. Time remaining within the USAC total project maximum build-out period of five years.

Contractor shall anticipate and commit to supporting a minimum 200% expansion of the number of participants above the minimum number of participants stated above. Contractor commitment shall include, but is not limited to the following:

1. Capability to expand project management staff and resources.
2. Capability to expand regional hub and core network infrastructure.
3. Support an expanded project statewide.
4. Maintain geographic equity.
5. Provide services equitably and uniformly to all CTN Participants.
6. Adhere to a project completion schedule of three years.
7. CTN-C prefers that for additional Participants whose connection requirements are equivalent to Participants itemized in Appendix C and as mutually agreed by CTN-C and Contractor, to extend standardized pricing that is proposed in response to this RFP, to all additional Participants, up to a maximum of 1200 Participant sites.

2.13.7.1.1.1 Bidder Response (M): Accomodating an Increase in Project Scope

Describe Bidder's capabilities to accommodate a minimum 200% increase in number of Participants over the minimum number stipulated above. Include discussion of each item 1 – 7 above.

2.14 Service Level Agreement

CTN-c requires that representations of circuit provisioning, as well as network quality, availability and performance to be underwritten by Service Level Agreements (SLA). Bidder SLA's must offer equivalent or better terms and remedies as those available for equivalent network services available under the State of California CalNet 2 MSA-1 through MSA-4 Contracts for telecommunications services (see the CalNet 2 URL listed below for information regarding the MSA-1 through MSA-4 Contracts and related material).

<http://www.calnet.ca.gov/>

2.14.1 Network Performance Benchmarks

CTN-C has established network performance benchmarks that are derived from the CalNet 2 MSA-3 IP Services Contract. CTN-C recognizes however, that throughout the entire State of California, depending upon where CTN Participant Sites are situated, and depending upon ILEC/CLEC facilities and capabilities (or equivalent), uniform adherence to these requirements may not be technically feasible. Consequently, Network Performance standards are expressed herein as Performance **Benchmarks**, rather than Performance **Requirements**.

The following requirements shall apply to Network Performance:

1. Contractor is expected to meet the Performance Benchmarks over the largest extent of CTN Participant Sites possible.
2. Bidders shall specifically designate those areas where Performance Benchmarks cannot be achieved.
3. Bidders shall propose alternative Performance standards for those coverage areas where the CTN Performance Benchmarks cannot be achieved.
4. Service Level Agreements shall underwrite proposed alternative performance standards.
5. Performance requirements shall apply to all Contractor-provided network components, circuits and service within the CTN.
6. CTN Performance Benchmarks, where applicable, shall be underwritten by Service Level Agreements
7. Excluding Network Performance Benchmarks, for which Bidders may propose alternative standards as described above, Bidder shall accept the terms and conditions as specified, and shall provide the remedies, penalty awards and compensation, as stipulated in the SLA's presented below.

NOTE:

1. Bidder shall receive additional quality points for extending support for the CTN Network Performance Benchmarks over the largest possible number of CTN Participant sites, as designated in Appendices C and D.

2. Bidder shall receive additional quality points for supporting performance standards exceeding the Performance Benchmarks.

2.14.2 Technical Benchmarks

CTN-C has established the following Technical Benchmarks listed below. Actual Performance shall be monitored, assessed and verified through one or more of the following means:

1. Performance reports provided by the Contractor
2. Independent SNMP monitoring service established by CTN-C, based upon SNMP feeds provided by Contractor.
3. Monitoring by CTN-C of Trouble Tickets submitted via Contractor's Trouble Ticket Management System.

2.14.3 Performance Benchmarks for End-to-End Performance

- **Availability** – 99.2 percent
- **Measurement** – Adhere to the Requirements set forth in individual SLA's below
- **Jitter (delay variance)** – Less than 15 ms
- **Packet Loss** – Maximum .5 percent
- **Latency/Delay** – 130 ms one way

2.14.3.1.1.1 Bidder Response (M): Adherence to Performance Benchmarks

For each CTN Participant Site listed in Appendices C and D, or each group of Bidder-designated equivalent sites, indicate whether the CTN Performance Benchmarks will be fully supported and underwritten by Service Level Agreements.

Describe the geographic coverage areas within which Bidder shall support the CTN Performance Benchmarks.

For each CTN Participant Site listed in Appendices C and D, or each group of Bidder-designated equivalent sites for which Bidder does not support the CTN Performance Benchmarks, provide the proposed alternative performance standards. Describe the geographic area over which the alternative performance standards apply.

2.14.3.1.1.2 Bidder Response (D) Exceeding Performance Benchmarks

For each CTN Participant Site listed in Appendices C and D, or for each group of Bidder-designated equivalent sites, describe whether SLA-backed performance standards are available that exceed the Performance Benchmarks. List the stated enhanced performance standards. Describe the geographic area over which the enhanced performance standards apply.

2.14.4 Service Level Agreement Overview

The intent of this section is to provide the Contractor with Requirements that define and assist in the management of the Service Level Agreements (SLA). This section identifies and explains the required SLAs for the IP services identified in this RFP. The intent of this section is to define performance objectives and measurement processes.

The SLAs shall each consist of the following components: services covered under the SLA, definition, measurement process, objective(s), immediate rights and remedies, and monthly rights and remedies. All applicable services are listed in each SLA.

Abbreviations

AMUC – Average Monthly Usage Cost

TMRC – Total Monthly Recurring Cost

2.14.4.1 Network Service Level Agreement Format

Services	SLA Name
[List of all applicable services]	<p>Definition [Definition or description of the SLA]</p> <p>Measurement Process [Instructions on how to measure network performance in order to determine compliance]</p> <p>Objective (s) [Defines the performance goal/parameters for each SLA. The objective(s) may be different than the technical Requirements found in Sections 2.2 through 2.12 et al.]</p> <p>Immediate Rights and Remedies [Allows immediate action by CTN-C (e.g., CTN-C Escalation), and/or rebates which are applied to their monthly invoices on a per occurrence basis (e.g., TTR).]</p> <p>Monthly Rights and Remedies <i>[Applicable to SLAS that require accumulation of statistics over a period of time or multiple trouble tickets (e.g., availability).]</i></p>

2.14.4.2 Technical Requirements versus SLA

This section shall distinguish between technical Requirements and the SLA objectives. Sections 2.2 to 2.12 identify the technical Requirements for each service. These Requirements are the minimum parameters each Bidder must meet in order for their Bid to qualify for award. Upon award the committed technical Requirements will be maintained throughout the remainder of the Contract.

Committed SLA objectives are minimum Requirements, for which the Contractor shall be held accountable for all rights and remedies accordingly.

2.14.4.3 Two Methods Of Outage Reporting: CTN-C Or Contractor

There are two methods in which outages may be identified and outage durations derived: CTN-C reported or Contractor reported.

- The first method results from a CTN Participant reporting service trouble to the Contractor’s CTN Service Center. CTN Participant reported trouble tickets track service failures or quality of service issues.
- In the second method of outage reporting, the Contractor shall open a ticket as a result of network alarms or identification of a service failure in the backbone. In each instance a trouble ticket shall be assigned and monitored until service is restored.

2.14.4.4 CTN-C Access to CTN-related Trouble Tickets

Contractor shall provide CTN-C with an online reporting service for regularly accessing all trouble tickets established for CTN-related service issues. The service shall minimally provide the following information and capabilities:

1. Open tickets
2. Tickets established during a defined period of time (previous day, week, month, etc.)
3. Provide the following information for each ticket:
 - a. Originator (Contractor, CTN Participant, CTN-C)
 - b. Problem description
 - c. Status
 - d. Corrective action

CTN-C reserves the right to intercede on behalf of all CTN Participants, in all issues related to CTN services, including, but not limited to:

1. Entering and tracking Problem tickets
2. Communicating with Contractor during problem resolution.
3. Approving and acknowledging problem resolution.

CTN-C retains the sole right for establishing, negotiating with Contractor and approving settlement of all claims for penalties, as established under the SLA Contract terms resulting from this RFP.

2.14.4.4.1.1 Bidder Response: (M) CTN-C Access to CTN Problem Tickets

Describe the online Problem Ticket Reporting Service that will be available to CTN-C, permitting access to all Problem Tickets posted by CTN Participants.

2.14.5 General Requirements

The following general Requirements are applicable to the Network SLAs:

1. The total rights and remedies for failure to satisfy a single service SLA for any given month shall not exceed the sum of 100 percent of the Total Monthly Recurring Cost (TMRC)
2. If the circuit fails to meet one or more of the performance objectives, only the largest monthly Rights and Remedies for all performance objectives not met will be credited to the CTN-C.

3. To the extent that Contractor offers additional or more advantageous rights and/or remedies to CTN-C for similar services offered through tariffs, online service guides, or other programs, CTN-C shall be entitled to exercise the rights and/or remedies therein
4. For subcontracted local services from other ILECs, CLECs or service providers, the Contractor shall provide the CTN-C at a minimum, the same service level agreements provided to Contractor by each subcontractor. Copies of all Service Level Agreements between Subcontractors and the awarded Contractor shall be provided to CTN-C for all services.
5. When the Contractor provides network services directly to the CTN-C in other ILEC's or CLEC's territories, the rights and remedies for service outages for those services are as set forth in the SLA section of this RFP.
6. The election by CTN-C of any remedy covered by this Contract shall not exclude or limit CTN-C's rights and remedies otherwise available within the Contract or at law or equity
7. The Contractor shall act as the single point of contact coordinating all entities to meet the CTN-C's needs for ordering/provisioning, maintenance, restoration and resolution of service issues or that of their Affiliates, subsidiaries, subcontractors or resellers under this Contract.
8. As an enhancement of their service offerings, Bidders may provide additional SLA's not specifically required under this RFP.

2.14.6 Trouble Ticket Stop Clock Conditions

“Stop Clock” events occur when circumstances develop beyond Contractor’s control and that affect Contractor’s ability to correct or mitigate problem events within the required elapsed time periods as specified in the relevant SLA’s.

Stop Clock criteria includes the following: (Note: in this section, the term “End-User” includes CTN Participants and/or CTN-C, whichever is applicable.)

1. Periods when a restoration or testing effort is delayed at the specific request of the End-User. The Stop Clock condition shall exist during the period the Contractor was delayed, provided that reasonable and documented efforts are made to contact the End-User during the applicable Stop Clock period.
2. Time after a service has been restored, but End-User request ticket be kept open for observation. If the service is later determined by the End-User to not have been restored, the Stop Clock shall continue until the time the End-User notifies the Contractor that the service has not been restored.
3. Time after a service has been restored, but End-User is not available to verify that the service is working. If the service is later determined by the End-User to not have been restored, the Stop Clock shall apply only for the time period between Contractor's reasonable attempt to notify the End-User that Contractor believes the service has been restored and the time the End-User notifies the Contractor that the service has not been

restored.

4. Restoration cannot be achieved because the problem has been isolated to wiring that is not maintained by Contractor, or any of its subsidiaries, subcontractors, or Affiliates.
5. Trouble caused by a power problem outside of the responsibility of the Contractor.
6. The following contact/access problems, provided that Contractor makes reasonable efforts to contact End-User during the applicable stop clock period:
 - a. *Access necessary to correct the problem is not available because access has not been arranged by site contact or End-User representative*
 - b. *Site contact refuses access to technician who displays proper identification*
 - c. *Insufficient or incorrect site contact information which prevents access, provided that Contractor takes reasonable steps to notify End-User of the improper contact information and takes reasonable steps to obtain the correct information.*
 - d. *Site has limited hours of business that directly impacts the Contractor's ability to resolve the problem.*
 - e. *If it is determined later that the cause of the problem was not at the site in question, then the Stop Clock shall not apply.*
7. Any problem or delay to the extent caused by End-User's staff that prevents or delays Contractor's resolution of the problem. In such event, Contractor shall make a reasonable request to End-User staff to correct the problem or delay.
8. End-User applications that interfere with repair of the trouble.
9. Repair/replacement of CPE not provided by Contractor if the problem has reasonably been isolated to the CPE.
10. Failure of the trouble ticket originator or responsible End-User to return a call from Contractor's technician for on-line close-out of trouble tickets after the service has been restored as long as Contractor can provide Documentation substantiating message from Contractor's technician.
11. An outage directly related to any properly performed scheduled maintenance or upgrade. Any such stop clock condition shall not extend beyond the scheduled period of the maintenance or upgrade. SLAs will apply for any maintenance caused outage beyond the scheduled maintenance period. Outages occurring during a scheduled maintenance or upgrade period and not caused by the scheduled maintenance shall not be subject to this paragraph 12 stop clock criteria.
12. Any problem or delay caused by a third party not under the control of Contractor, not reasonably preventable by Contractor, including, at a minimum, cable cuts not caused by the Contractor. Contractor's Affiliates, subsidiaries, or subcontractors shall be deemed to be under the control of Contractor with respect to the Equipment, services, or Facilities to be provided under this Contract.

2.14.7 Service Level Agreements Required

2.14.7.1 Service Availability Percentage

Services	Availability Percentage
<p>Managed IP Network Services</p> <p>IP Transport Services</p>	<p>Definition</p> <p>The monthly availability percentage equals the Scheduled Uptime per month less Unavailable Time divided by Scheduled Uptime per month multiplied by 100 per service ID. Scheduled uptime is based on 7x24x number of days in the month.</p> <p>Measurement Process</p> <p>The monthly Availability percentage shall be based on the accumulative total of all outage durations for each port number/service ID, per calendar month. All outage durations applied to other SLAs, which result in a remedy, will be excluded from the monthly accumulative total.</p> <p>Objectives</p> <p>99.2 percent</p> <p>Immediate Rights and Remedies</p> <p>End-User Escalation Process</p> <p>CTN-C Escalation Process</p> <p>Monthly Rights and Remedies</p> <p>First month to fail to meet the SLA objective shall result in a 15 percent rebate of the.</p> <p>Next consecutive month to fail to meet the SLA objective shall result in a 25 percent rebate of TMRC.</p> <p>Each additional consecutive month to fail to meet the SLA objective shall result in a 50 percent rebate of the TMRC.</p>

:

2.14.7.2 Catastrophic Outage 1

Services	Catastrophic Outage 1
<p>Managed IP Network Services</p> <p>IP Transport Services</p>	<p>Definition</p> <p>The total loss of CTN network services at one address.</p> <p>Measurement Process</p> <p>The outage start shall be determined by the network alarm resulting from the outage-causing event or the opening of a trouble ticket by an End-User/CTN-C, whichever occurs first. The Contractor shall open a trouble ticket and compile a list for each End-User service affected by the common cause. Each End-User service is out of service from the first notification until the Contractor determines the service is restored. Any service reported by End-User/CTN-C as not having been restored shall have the outage time adjusted to the actual restoration time.</p> <p>(7X24)</p> <p>Objectives</p> <p>Less than 2 hours;</p> <p>Immediate Rights and Remedies</p> <p>100 percent of the TMRC for each service not meeting the per occurrence objective for a single Cat 1 fault</p> <p>End-User Escalation Process</p> <p>CTN-C Escalation Process</p> <p>Monthly Rights and Remedies</p> <p>N/A</p>

:

2.14.7.3 Catastrophic Outage 2

Services	Catastrophic Outage 2
<p>Managed IP Network Services</p> <p>IP Transport Services</p>	<p>Definition</p> <p>A total failure of the Contractor's (or subcontractor's or Affiliate's) network Equipment nearest the End-User locations regardless of where the failure occurs in the network. .</p> <p>Measurement Process</p> <p>The outage duration start shall be determined by the network alarm resulting from the outage-causing event or the opening of a trouble ticket by the End-User/CTN-C, whichever occurs first. Outage duration shall be measured on a per End-User service basis from information recorded from the network Equipment or trouble ticket</p> <p>The Contractor shall open a trouble ticket and compile a list for each service affected by the common cause. Each End-User service is considered out of End-User service from the first notification until the Contractor determines the End-User service is restored. Any End-User service reported by the End-User/CTN-C as not having been restored shall have the outage time adjusted to the actual restoration time.</p> <p>(7X24)</p> <p>Objectives</p> <p>Less than 30 minutes</p> <p>Immediate Rights and Remedies</p> <p>100 percent of the TMRC for each service not meeting the per occurrence objective for a single Cat 2 fault</p> <p>End-User Escalation Process</p> <p>CTN-C Escalation Process</p> <p>Monthly Rights and Remedies</p> <p>N/A</p>

:

2.14.7.4 Catastrophic Outage 3

Services	Catastrophic Outage 3
<p>Managed IP Network Services</p> <p>IP Transport Services</p>	<p>Definition</p> <p>The total loss of any service type on a network wide basis.</p> <p>Measurement Process</p> <p>The outage duration start shall be determined by the network alarm resulting from the outage-causing event or the opening of a trouble ticket by the End-User/CTN-C, whichever occurs first. Outage duration shall be measured on a per End-User service basis from information recorded from the network Equipment or trouble ticket.</p> <p>The Contractor shall open a trouble ticket and compile a list for each End-User service affected by the common cause. Each End-User service is out of service from the first notification until the Contractor determines the End-User service is restored. Any service reported by End-User/CTN-C as not having been restored shall have the outage time adjusted to the actual restoration time.</p> <p>(7X24)</p> <p>Objectives</p> <p>Less than 15 minutes</p> <p>Immediate Rights and Remedies</p> <p>Senior Management Escalation Process</p> <p>100 percent of the TMRC for each service not meeting the per occurrence objective for a single Cat 3 fault</p> <p>Monthly Rights and Remedies</p> <p>N/A</p>

2.14.7.5 Round Trip Transmission Delay

Services	Round Trip Transmission Delay
<p>Managed IP Network Services</p> <p>IP Transport Services</p>	<p>Definition</p> <p>Average round trip transfer delay measured from Contractor’s to CTN-Participant hand off (CCH) to the remote CCH and back</p> <p>Measurement Process</p> <p>End-User/CTN-C is responsible for opening a trouble ticket with the Contractor’s CTN Service Center (helpdesk) when the data transfer delay is below the committed level. CTN-C shall determine the sample interval, provided that a minimum of 100 pings or more shall constitute test. The problem requires timely verification, consistent with industry Standards (e.g., a protocol analyzer), by the Contractor. Trouble shall be tracked as a Quality of Service (QOS) problem using a special disposition code on the trouble ticket. QOS tickets shall not count in availability or Time to Repair measurements unless and until the End-User reports service as unusable for its intended uses.</p> <p>(7x24)</p> <p>Objectives</p> <p>IP Transport Services:</p> <p>1.536Mbps – 10 MBps</p> <p>64 byte ping: <120ms</p> <p>1000 byte ping: <400ms</p> <p>Immediate Rights and Remedies</p> <p>15 percent of TMRC per occurrence for the reported service.</p> <p>Next consecutive month to fail to meet the SLA objectives shall result in a 25 percent rebate of TMRC.</p> <p>Each additional consecutive month to fail to meet the SLA objective shall result in a 50 percent rebate of the TMRC.</p> <p>End-User Escalation Process</p> <p>CTN-C Escalation Process</p> <p>Monthly Rights and Remedies</p> <p>N/A</p>

2.14.7.6 One-Way Transmission Delay

Services	One-Way Transmission Delay
<p>Managed IP Network Services</p> <p>IP Transport Services</p>	<p>Definition</p> <p>Average one-way transfer delay measured from the Contractor to CTN-Participant handoff to the remote Contractor to CTN-Participant handoff</p> <p>Measurement Process</p> <p>End-User/CTN-C is responsible for opening a trouble ticket with the Contractor’s CTN Service Center (helpdesk) when the data transfer delay fails to meet the committed level. The problem requires timely verification, consistent with industry Standards (e.g., a protocol analyzer), by the Contractor. Trouble shall be tracked as a Quality of Service (QOS) problem using a special disposition code on the trouble ticket. QOS tickets shall not count in availability or Time to Repair measurements unless and until the End-User reports service as unusable for its intended uses.</p> <p>This measurement applies to local loop transport under the control of the Contractor or not under the control of Contractor that do not exceed 70% peak utilization for three consecutive business days.</p> <p>(7x24)</p> <p>Objectives</p> <p>less than 130 ms one way</p> <p>Immediate Rights and Remedies</p> <p>15 percent of TMRC per occurrence for the reported service.</p> <p>Next consecutive month to fail to meet the SLA objectives shall result in a 25 percent rebate of TMRC.</p> <p>Each additional consecutive month to fail to meet the SLA objective shall result in a 50 percent rebate of the TMRC.</p> <p>End-User Escalation Process</p> <p>CTN-C Escalation Process</p> <p>Monthly Rights and Remedies</p> <p>N/A</p>

2.14.7.7 Jitter

Services	Jitter
<p>Managed IP Network Services</p> <p>IP Transport Services</p>	<p>Definition</p> <p>Variations in transfer delay measured from the Contractor to CTN-Participant handoff to the remote Contractor to CTN-Participant handoff</p> <p>Measurement Process</p> <p>End-User/CTN-C is responsible for opening a trouble ticket with the Contractor CTN Service Center (helpdesk) when the jitter exceeds the committed level. The problem requires timely verification, consistent with industry Standards (calculations defined in: IETF RFC 3550 RTP, RFC 3611 RTP), by the Contractor. Trouble shall be tracked as a Quality of Service (QOS) problem using a special disposition code on the trouble ticket. QOS tickets shall not count in availability or Time to Repair measurements unless and until the End-User reports service as unusable for its intended uses.</p> <p>This measurement applies to local loop transport under the control of the Contractor or not under the control of Contractor that do not exceed 70% peak utilization for three consecutive business days (7x24)</p> <p>Objectives</p> <p>Less than 15 ms</p> <p>Immediate Rights and Remedies</p> <p>15 percent of TMRC per occurrence for the reported service.</p> <p>Next consecutive month to fail to meet the SLA objectives shall result in a 25 percent rebate of TMRC.</p> <p>Each additional consecutive month to fail to meet the SLA objective shall result in a 50 percent rebate of the TMRC.</p> <p>End-User Escalation Process</p> <p>CTN-C Escalation Process</p> <p>Monthly Rights and Remedies</p> <p>N/A</p>

2.14.7.8 Packet Loss

Services	Packet Loss
<p>Managed IP Network Services</p> <p>IP Transport Services</p>	<p>Definition</p> <p>Packet loss is measured from Contractor’s hand off to CTN-C at each end of data channel.</p> <p>Measurement Process</p> <p>End-User/CTN-C is responsible for opening a trouble ticket with the Contractor’s CTN Service Center (helpdesk) when the data packet loss exceeds the committed level. The problem requires timely verification, consistent with industry Standards (e.g., protocol analyzer), by the Contractor. Trouble shall be tracked as a Quality of Service (QOS) problem using a special disposition code on the trouble ticket. QOS tickets shall not count in availability or Time to Repair measurements unless and until the End-User reports service as unusable for its intended uses.</p> <p>This measurement applies to local loop transport under the control of the Contractor or not under the control of Contractor that do not exceed 70% peak utilization for three consecutive business days (7x24)</p> <p>Objectives</p> <p>0.5 percent maximum packet loss</p> <p>Immediate Rights and Remedies</p> <p>15 percent of TMRC per occurrence for the reported service.</p> <p>Next consecutive month to fail to meet the SLA objectives shall result in a 25 percent rebate of TMRC.</p> <p>Each additional consecutive month to fail to meet the SLA objective shall result in a 50 percent rebate of the TMRC.</p> <p>End-User Escalation Process</p> <p>CTN-C Escalation Process</p> <p>Monthly Rights and Remedies</p> <p>N/A</p>

2.14.7.9 Excessive Outage

Services	Excessive Outage
<p>Managed IP Network Services</p> <p>IP Transport Services</p>	<p>Definition</p> <p>An Excessive outage shall be defined as a trouble ticket that remains opened with the Contractor on a service, for more than twelve hours.</p> <p>Measurement Process</p> <p>The service is unusable during the time the trouble ticket is reported as opened until restoration of the service, minus stop clock conditions. Any service reported by End-User/CTN-C as not having been restored shall have the outage time adjusted to the actual restoration time.</p> <p>(7 x 24)</p> <p>Objectives</p> <p>Less than 12 hours</p> <p>Immediate Rights and Remedies</p> <p>Senior Management Escalation</p> <p>CTN-C may request from Contractor an Excessive Outage restoration briefing.</p> <p>100 percent of the TMRC per occurrence for each service out of service greater than 12 hours.</p> <p>Monthly Rights and Remedies</p> <p>N/A</p>

2.14.7.10 Notification

Services	Notification
<p>Managed IP Network Services</p> <p>IP Transport Services</p>	<p>Definition</p> <p>The Contractor notification to CTN-C in the event of a Catastrophic Outage, network failure, terrorist activity, or threat of natural disaster, which results in a significant loss of telecommunication services to CTN-C End-Users or has the potential to impact services in a general or statewide area.</p> <p>Measurement Process</p> <p>The Contractor shall invoke the notification process for all CAT 1, CAT 2, and CAT 3 Outages or network outages resulting in significant loss of services. The Contractor shall notify CTN-C via the Contractor’s automated notification system.</p> <p>Updates shall be given on the above-mentioned failures via the Contractor’s automated notification system which shall include time and date of the updates.</p> <p>Objectives</p> <p>Within 30 minutes of a CAT 1, CAT 2, or CAT 3 failure, the Contractor shall notify general stakeholders (as determined by CTN-C) via the Contractor’s automated notification system.</p> <p>At 60 minute intervals, updates shall be given on the above mentioned failures via the Contractors automated notification system which shall include time and date of the updates.</p> <p>Immediate Rights and Remedies</p> <p>Senior Management Escalation</p> <p>Monthly Rights and Remedies</p> <p>N/A</p>

2.14.7.10.1.1 Bidder Response (M): Service Level Agreements

Describe Bidder's understanding and acceptance of the SLA terms stipulated in this Section, including the following specific SLA terms:

1. Two Methods Of Outage Reporting: CTN-C Or Contractor
2. CTN-C Access to CTN-related Trouble Tickets
3. General Requirements
4. Trouble Ticket Stop Clock Conditions (M)
5. Service Availability Percentage
6. Catastrophic Outage 1
7. Catastrophic Outage 2
8. Catastrophic Outage 3
9. Round Trip Transmission Delay
10. One-Way Transmission Delay
11. Jitter
12. Packet Loss
13. Excessive Outage
14. Notification

Itemize under each Requirement, any exceptions to the stipulated requirements.

3 Section C: Financial Terms and Conditions

3.1.1 Source of Funds and Contractor Reimbursement

The California Telehealth Network project is receiving major financial support from the Federal Communications Commission Rural Health Care Pilot Program (RHCPP). The Universal Services Administrative Company (USAC) on behalf of the FCC is administering the program. Payment to the Contractor for all goods and services provided under the RHCPP will be derived as follows:

1. 15% of charges eligible for RHCPP reimbursement are payable by CTN-C.
2. Up to 85% of charges eligible for RHCPP reimbursement are payable by USAC.
3. 100% of charges not eligible for RHCPP reimbursement are payable by CTN-C.
4. Up to 50% of the remaining charges (after receipt of at least 85% payment from other sources) for services eligible for the California Teleconnect fund (CTF) are payable by CTF.

All payments for goods and services associated with design, installation, maintenance and management of CTN resources and facilities shall be solely by reimbursement to Contractor. USAC, CTN-C, or any organization providing collateral funding to CTN-C shall not provide any advance payments to Contractor for goods or services provided.

Contractor shall obtain reimbursement for goods and services provided by submission of regular invoices to the appropriate funding entity.

Contractor shall individually invoice and collect payments from each of the following entities, according to applicable federal and state government policies and procedures, as well as procedures jointly agreed upon by Contractor and CTN-C:

1. California Teleconnect Fund (where applicable)
2. Universal Services Administrative Company on behalf of FCC RHCPP
3. CTN-C
4. Other federal, state or private granting agencies that may require direct invoicing from the contractor for goods and services provided.

3.1.2 Prohibition on Contractor Reimbursements to CTN Participants

FCC/USAC policies under the RHCPP prohibit Contractor from providing monetary compensation or anything of value to any CTN participants in return for the use of any Participant-provided facilities, goods or services for the CTN, including but not limited to:

1. Facilities expenses
2. Supply expenses

CTN RFP #2008-001

3. Operating expenses
4. Personnel expenses

CTN Participants include, but are not limited to:

1. University of California
2. Regional Telehealth Networks (see Appendix D)
3. CTN Participants (see Appendix C)
4. CTN Consortium Members not otherwise mentioned (see Section A, Introduction, for a list of CTN Consortium Members).

3.1.3 California Teleconnect Fund and RHCPP Co-funding

Some participants in the CTN who are eligible for RHCPP reimbursements may currently, or in the future, also participate in the California Teleconnect Fund Program (CTF). See CPUC's Decision 08-06-020 and the following Web Site for additional information regarding the CTF:

<http://www.cpuc.ca.gov/PUC/Telco/Public+Programs/CTF/>

For CTF eligible services, the Contractor shall assume the following responsibilities:

1. Invoice the California Public Utilities Commission for reimbursement for eligible expenses under the CTF Program, according to the requirements of that program. This includes but is not limited to demonstrating that the CTF- eligible service is integral to the CTN.
2. Submit one invoice for all CTN participants for only CTF-eligible services integral to the CTN. Even if the CTN participant is also a CTF-approved participant, those services unrelated to CTN cannot be included in the invoice.
3. Invoice the CTF program for 50% of the balance for CTF-eligible telecommunications expenses only after receipt of at least 85% payment from all other sources.
4. Respond in a timely manner to the CPUC's and auditors' requests for information regarding invoices and audits.
5. Maintain for five years for auditing purposes all records underlying the invoices to the CTF program, including but not limited to the services used by the individual CTN participants and associated expenses.

3.1.4 CalNet 2 Rate Structure and Pricing Equivalency

CTN-C desires to obtain for all applicable products and services, rate structures, pricing and terms that are equivalent to those available under the State of California, CalNet 2 Program.

CTN RFP #2008-001

Bidders are referred to the following online resources for detailed information regarding the CalNet 2 Program, including contract terms and pricing.

<http://www.calnet.ca.gov/>

CTN-C specifically desires the following equivalent terms and conditions for packet data services, as provided under CalNet 2 Master Service Agreements MSA-1 and MSA-3:

Statewide Pricing (Postalized rates) – Bidder shall provide statewide pricing for packet data services, including data installation, provisioning and monthly service fees for circuits and associated managed packet data services.

NOTE: Cost proposals that provide statewide pricing for circuits and packet data services will receive additional quality points.

Month-to-Month Service Commitment for CTN Participants – Contractor shall provide the contracted services to each individual CTN Participant site on a month-to-month commitment basis. CTN-C shall provide Contractor with a minimum of thirty days notice of service terminations.

Fixed pricing for the Term of the Contract – the Contract executed shall stipulate a fixed pricing schedule for all contracted services over a minimum three-year term of the contract.

New Service Offerings and Price Adjustment – During the term of the Contract, CTN-C desires to take advantage of any new or improved services that Contractor may offer in future, if such services provide superior performance, or equivalent performance at lower cost. Bidder shall provide to CTN-C the option to update currently contracted services to new, improved, or equivalent lower-cost services that are not part of the Contract, but are generally made available by Contractor to other customers. Bidder shall agree to waive any termination or penalty fees otherwise resulting from discontinuing or modifying existing services.

3.1.5 Additional Terms and Conditions

Service Commitments for certain services shall be provided and extended on a year-to-year basis. These include:

1. Firewall Services
2. Web Content Filtering Services
3. Connection to External Networks

If CTN-C elects to terminate one or more of these services, CTN-C shall provide Contractor a minimum of 90 days notice prior to the annual anniversary.

3.1.6 USAC-RHCPP Invoicing and Payment Policies and Procedures

CTN RFP #2008-001

Contractor shall adhere to all USAC policies, procedures and requirements established under the Rural Health Care Pilot Program (RHCPP) including, but not limited to the following:

1. Supporting documentation required for billable services
2. Itemization of invoices in sufficient detail to discriminate between RHCPP-reimbursable and non-reimbursable services.
3. Inclusion with all invoices submitted to USAC, certification of receipt of payment by CTN-C of its required 15% co-payment to Contractor.

Additional information regarding USAC RHCPP Contractor requirements can be found at the following online sources:

<http://www.universalservice.org/rhc-pilot-program/>

Specific information regarding the Rural Health Care Vendor Pilot Process can be found at the following URL:

<http://www.usac.org/rhc-pilot-program/vendors/>

FCC RHCPP Order Requirements – Bidder shall adhere to all relevant terms and conditions established by the FCC RHCPP Order. The complete FCC RHCPP Order can be found at the following URL:

<http://www.universalservice.org/rhc-pilot-program/tools/fcc-orders.aspx>

Forbearance for Payment Delay – Bidder shall not levy upon CTN-C, any late payment fines or penalties for payment delays attributable to USAC, CTF or any other federal or state government programs to which Contractor may directly submit invoices for CTN goods and services.

Termination Fees – If at the date of normal termination of the Contract, CTN-C or the CTN Participant sites individually elect to discontinue any or all of the services provided under the terms of the Contract, Bidder shall waive the right to any termination or disconnect fees for all services provided to CTN-C. Bidder shall establish appropriate terms and conditions with the Bidder's partners and subcontractors such that they will also waive any termination or disconnect fees.

3.1.7 Invoicing CTN-C

Invoice Schedule – Contractor shall invoice CTN-C on a regular monthly basis.

Unified Invoicing for all Contracted Products and Services – Contractor shall provide unified invoicing for all goods and services provided to the CTN-C. Unified invoicing shall include billable fees for all goods and services provided by sub-contractors.

Required Information -Invoices shall include a description of each individual charge in sufficient detail that following designations can be identified:

CTN RFP #2008-001

1. RCHPP reimbursable goods and services
2. CTF reimbursable goods and services
3. Equipment, circuit charges and service fees associated with connecting or peering to external networks.
4. Charges for Ancillary services as described in Section 2.9 (e.g., firewall services)

Electronic Format – Contractor shall provide invoices to CTN-C in a business-standard electronic format that is mutually acceptable to CTN-C and Contractor.

3.1.8 Invoicing Third Party Payers

Invoicing Multiple Payers – Contractor shall invoice separately, CTN-C, USAC-RHCPP, CPUC-CTF and/or other federal or state government granting programs as designated by CTN-C that currently or in the future, provide financial support for the CTN and that may require direct invoicing by Contractor.

1. Contractor shall provide invoices with content and format that is acceptable to each payer.
2. Contractor shall adhere to all terms and conditions established by federal and state government payers.
3. In the case of multiple payers, Contractor shall submit invoices in the proper sequential fashion, properly credit partial payments by each payer and document on the invoices, required prior partial payments at each step in the multiple invoice process, in compliance with federal and state government invoicing and documentation requirements.
4. Contractor shall provide invoicing services at no cost to CTN.

Third Party Payer Electronic Format Requirements - Contractor shall provide invoices in an acceptable electronic format to all federal and state government payers who provide CTN funding and who may require electronic submissions of invoices directly from Contractor.

3.1.8.1.1.1 Bidder Response (M): Financial Terms and Conditions

Describe Bidder's understanding and acceptance of the financial terms and conditions stipulated in this Section, including the terms and conditions specified in the following subsections above:

1. Source of Funds and Contractor Reimbursement
2. Prohibition on Contractor Reimbursements to CTN Participants
3. California Teleconnect Fund and RHCPP Co-funding
4. CalNet 2 Rate Structure and Pricing Equivalency
5. Additional Terms and Conditions
6. USAC-RHCPP Invoicing and Payment Policies and Procedures
7. FCC RHCPP Order Requirements
8. Invoicing CTN-C
9. Invoicing Third Party Payers

CTN RFP #2008-001

Itemize under each subsection title, any exceptions to the stipulated Mandatory requirements. For terms and conditions Desired by CTN-C, indicate Bidder's acceptance of the terms, or describe alternative terms that Bidder proposes.

4 Section D: Cost Reporting Requirements

4.1.1 Cost Reporting: Organization Requirements

CTN anticipates that various Bidders to the CTN RFP will propose architecturally diverse network designs. Consequently, CTN-C requires that Bidders provide cost proposal information in a standardized format, thereby facilitating direct comparison of cost information among multiple proposal submissions.

Bidders shall use the CTN Cost Reporting Worksheets and the detailed instructions provided in the Cost Reporting Appendices to prepare and submit their cost proposals. Appendix F contains a series of Cost Worksheets (in Microsoft Windows Excel 2007 format) that Bidders shall use to submit their cost proposal information.

4.1.2 Cost Worksheet Organization

Cost proposals shall be organized into four separate cost worksheet categories:

Participant Cost Items Worksheet (PCI; see Appendix F-1) – Bidder shall use the spreadsheets in Appendix F-1 to submit detailed cost information for all goods and services that relate to directly connecting the individual CTN Participant sites to the CTN.

CTN Regional Hub, Core and RTN Hub Cost Worksheets (RHCC; see Appendix F-2) – Bidder shall use the spreadsheets in Appendix F-2 to submit cost proposals for all costs associated with establishing and maintaining any required regional hub and core network infrastructure to which CTN Participant Sites will be connected (PE and Core network infrastructure). The RHCC worksheets will also be used to report cost proposals for connecting to the CTN, the sites designated as Regional Telehealth Network hub sites listed in Appendix D.

External Network Connection Worksheet (ENC; see Appendix F-3) – Bidder shall use the ENC Worksheets to itemize and summarize detailed cost information for all goods and services that relate to connecting into the CTN, the external networks designated in Section 2.12.1.1 ‘External Networks’.

Ancillary Network Services and Miscellaneous Cost Worksheets (see Appendix CTN-RFP-F-3) - Bidder shall itemize and summarize detailed cost information for providing the requested network services designated in Section B, ‘Managed Firewall/IDS and Web Content Filtering Services’. Bidder may organize the ancillary cost proposal in whatever manner clearly and comprehensively itemizes service costs. Cost proposal must separately include the following quotations for each service required.

1. Non-Recurring Costs, quoted for project Years 1, 2 and 3.

CTN RFP #2008-001

2. Recurring monthly costs, quoted on a “per-participant” basis
3. Equipment and software purchase and licensing costs, quoted for project Years 1,2, and 3, if charged separately.

Bidder shall use a separate tab of this worksheet to report miscellaneous costs not reported elsewhere.

4.1.3 Cost Worksheet Format

Each Worksheet contains a “Section Index” column. Each row within the Section Index Column contains a reference to an indexed item in this RFP.

CTN-C has grouped within each Cost Worksheet, Section Index references and short descriptions for each item that CTN-C requires to be included within that particular Cost Worksheet. Each item reference designated as Mandatory or Mandatory/Optional within this RFP is included only once within the collection of Cost Worksheets. Each item reference has been placed in the Cost Worksheet that most closely pertains to its purpose and function.

Each Cost Worksheet contains columns for Non-recurring and Recurring costs.

4.1.4 Mandatory Cost Reporting

The Cost Worksheets each contain a column wherein each line item is designated as one of the following:

1. Mandatory (**M**)
2. Mandatory/Optional (**MO**)
3. Desirable (**D**)

Bidders are required to provide a cost for each individual line item in the Cost Worksheets that are designated as Mandatory or Mandatory/Optional. References to all such items are included in the collection of Cost Worksheets (see Appendix F).

4.1.5 Reporting of Costs

Costs shall be reported as described in the instructions given for each worksheet in Appendix F.

4.1.6 Grouping of CTN Participants

In order to simplify and streamline Bidder’s cost proposal, Bidders are permitted to define groups of CTN Participants or RTN Hub sites for purposes of reporting costs. Appendix E provides detailed instructions for defining and using Groups.

5 Section E: Economic Sustainability

5.1.1 Economic Sustainability features

Bidders shall discuss how their design can facilitate long-term economic sustainability of the CTN. The FCC RHCPP will subsidize supported services for a maximum period of five years, or until the awarded funds are expended. Following that period, the CTN must become financially self-sustaining, or must identify alternative funding sources to support continued operation. Bidders should discuss how their network architecture and associated services could be conducive to facilitating long-term economic sustainability for the CTN. Bidders may wish to include discussions of how the following specific funding opportunities can be supported.

1. Leasing (or subleasing) network resources to government or non-profit entities (example: municipal or county governments may wish to connect or integrate their network into the CTN for the purpose of gaining secure, quality and reliable access to CTN clinical and educational services).
2. Integration of CTN into external federal or state government networks for the purpose of making clinical services provided by CTN Participant facilities available to the external entities (example: connection to the California Prison Receivership (CPR) Network, extending the security, quality of service and reliability of the CTN to that organization, for the purpose of providing clinical referral services to the California Department of Corrections).
3. Supporting Converged Services on the CTN, thereby facilitating cost-avoidance.
4. Converged Network Services that promote Cost avoidance. CTN-C encourages Bidders to discuss how their design possesses inherent capabilities to support converged services (e.g., VOIP), or other features which if implemented, could lead to cost avoidance for currently non-converged services. Such savings could partially or fully amortize CTN costs.

5.1.1.1.1 Bidder Response (M): Economic Sustainability Features

Bidder shall discuss features and capabilities of the proposed network design and supporting services that can facilitate long-term economic sustainability for the CTN.

6 Appendices

6.1 Appendix A: University of California, Terms and Conditions of Purchase

ARTICLE 1 - The materials, supplies or services covered by this order shall be furnished by Seller subject to all the terms and conditions set forth in this order including the following, which Seller, in accepting this order, agrees to be bound by and to comply with in all particulars and no other terms or conditions shall be binding upon the parties unless hereafter accepted by them in writing. Written acceptance or shipment of all or any portion of the materials or supplies, or the performance of all or any portion of the services, covered by this order shall constitute unqualified acceptance of all its terms and conditions. The terms of any proposal referred to in this order are included and made a part of the order only to the extent it specifies the materials, supplies, or services ordered, the price therefor, and the delivery thereof, and then only to the extent that such terms are consistent with the terms and conditions of this order.

ARTICLE 2 - INSPECTION. The services, materials and supplies furnished shall be exactly as specified in this order free from all defects in Seller's performance, design, workmanship and materials, and, except as otherwise provided in this order, shall be subject to inspection and test by University at all times and places. If, prior to final acceptance, any services and any materials and supplies furnished therewith are found to be incomplete, or not as specified, University may reject them, require Seller to correct them without charge, or require delivery of such materials, supplies, or services at a reduction in price which is equitable under the circumstances. If Seller is unable or refuses to correct such items within a time deemed reasonable by University, University may terminate the order in whole or in part. Seller shall bear all risks as to rejected services and, in addition to any costs for which Seller may become liable to University under other provisions of this order, shall reimburse University for all transportation costs, other related costs incurred, or payments to Seller in accordance with the terms of this order for unaccepted services and materials and supplies incidental thereto. Notwithstanding final acceptance and payment, Seller shall be liable for latent defects, fraud or such gross mistakes as amount to fraud.

ARTICLE 3 - CHANGES. University may make changes within the general scope of this order in drawings and specifications for specially manufactured supplies, place of delivery, method of shipment or packing of the order by giving notice to Seller and subsequently confirming such changes in writing. If such changes affect the cost of or the time required for performance of this order, an equitable adjustment in the price or delivery or both shall be made. No change by Seller shall be allowed without written approval of University. Any claim of Seller for an adjustment under this Article must be made in writing within thirty (30) days from the date of receipt by Seller of notification of such change unless University waives this condition in writing. Nothing in this Article shall excuse Seller from proceeding with performance of the order as changed hereunder.

ARTICLE 4 - TERMINATION

A. University may, by written notice stating the extent and effective date, cancel and/or terminate this order for convenience in whole or in part, at any time. University shall pay Seller as full compensation for performance until such termination:

(1) the unit or pro rata order price for the performed and accepted portion; and
(2) a reasonable amount, not otherwise recoverable from other sources by Seller as approved by University, with respect to the unperformed or unaccepted portion of this order, provided compensation hereunder shall in no event exceed the total order price.

B. University may by written notice terminate this order for Seller's default, in whole or in part, at any time, if Seller refuses or fails to comply with the provisions of this order, or so fails to make progress as to endanger performance and does not cure such failure within a reasonable period of time, or fails to perform the services within the time specified or any written extension thereof. In such event, University may purchase or otherwise secure services and, except as otherwise provided herein, Seller shall be liable to University for any excess costs occasioned University thereby.

If, after notice of termination for default, University determines that the Seller was not in default or that the failure to perform this order was due to causes beyond the control and without the fault or negligence of Seller (including, but not restricted to, acts of God or of the public enemy, acts of University, acts of Government, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, unusually severe weather, and delays of a subcontractor or supplier due to such causes and without the fault or negligence of the subcontractor or supplier), termination shall be deemed for the convenience of University, unless University shall determine that the services covered by this order were obtainable by Seller from other sources in sufficient time to meet the required performance schedule.

C. If University determines that Seller has been delayed in the work due to causes beyond the control and without the fault or negligence of Seller, University may extend the time for completion of the work called for by this order, when promptly applied for in writing by Seller; any extension granted shall be effective only if given in writing. If such delay is due to failure of University, not caused or contributed to by Seller, to perform services or deliver property in accordance with the terms of the order, the time and price of the order shall be subject to change under the Changes Article. Sole remedy of Seller in event of delay by failure of University to perform shall, however, be limited to any money actually and necessarily expended in the work during the period of delay, solely by reason of the delay. No allowance will be made for anticipated profits.

D. The rights and remedies of University provided in this Article shall not be exclusive and are in addition to any other rights and remedies provided by law or under this order.

E. As used in this Article, the word "Seller" includes Seller and its suppliers at any tier.

ARTICLE 5 - LIABILITY FOR UNIVERSITY - FURNISHED PROPERTY. Seller assumes complete liability for any tooling, articles or material furnished by University to Seller in connection with this order and Seller agrees to pay for all such tooling, articles or material

damaged or spoiled by it or not otherwise accounted for to University's satisfaction. The furnishing to Seller of any tooling, articles, or material in connection with this order shall not, unless otherwise expressly provided, be construed to vest title thereto in Seller.

ARTICLE 6 - TITLE. Title to the material and supplies purchased hereunder shall pass directly from Seller to University at the f.o.b. point shown, or as otherwise specified in this order, subject to the right of University to reject upon inspection.

ARTICLE 7 - PAYMENT, EXTRA CHARGES, DRAFTS. Seller shall be paid, upon submission of acceptable invoices, for materials and supplies delivered and accepted or services rendered and accepted. University will not pay cartage, shipping, packaging or boxing expenses, unless specified in this order. Drafts will not be honored. Invoices must be accompanied by shipping documents or photocopies of such, if transportation is payable and charged as a separate item.

ARTICLE 8 - CHARACTER OF SERVICES. Seller, as an independent contractor, shall furnish all equipment, personnel and material sufficient to provide the services expeditiously and efficiently during as many hours per shift and shifts per week and at such locations as the University may so require and designate.

ARTICLE 9 - INDEMNITY.

A. General. Seller shall defend, indemnify, and hold harmless University, its officers, employees, and agents, from and against all losses, expenses (including attorneys' fees), damages, and liabilities of any kind resulting from or arising out of this agreement and/or Seller's performance hereunder, provided such losses, expenses, damages and liabilities are due or claimed to be due to the negligent or willful acts or omissions of Seller, its officers, employees, agents, subcontractors, or anyone directly or indirectly employed by them, or any person or persons under Seller's direction and control.

B. Proprietary Rights. Seller shall indemnify, defend, and hold harmless University, its officers, agents, and employees against all losses, damages, liabilities, costs, and expenses (including but not limited to attorneys' fees) resulting from any judgment or proceeding in which it is determined, or any settlement agreement arising out of the allegation, that Seller's furnishing or supplying University with parts, goods, components, programs, practices, or methods under this order or University's use of such parts, goods, components, programs, practices, or methods supplied by Seller under this order constitutes an infringement of any patent, copyright, trademark, trade name, trade secret, or other proprietary or contractual right of any third party. The foregoing shall not apply unless University has informed Seller as soon as practicable of the suit or action alleging such infringement. Seller shall not settle such suit or action without the consent of University. University retains the right to participate in the defense against any such suit or action.

C. Products. Seller shall fully indemnify, defend, and hold harmless University from and against any and all claim, action, and liability, for injury, death, and property damage, arising out of the dispensing or use of any of Seller's product provided under authorized University orders. In addition to the liability imposed by law on the Seller for damage or injury (including death) to persons or property by reason of the negligence, willful acts or omissions, or strict liability of the Seller or his agents, which liability is not impaired or otherwise affected hereby, the Seller hereby assumes liability for and agrees to save University harmless and indemnify it from every expense, liability or payment by reason of any damage or injury (including death) to persons or property suffered or claimed to have been suffered through any act or omission of the Seller.

The University agrees to provide Seller with prompt notice of any such claims and to permit Seller to defend any claim or suit, and that it will cooperate fully in such defense.

ARTICLE 10 - DECLARED VALUATION OF SHIPMENTS.

Except as otherwise provided on the face of this order, all shipments by Seller under this order for University's account shall be made at the maximum declared value applicable to the lowest transportation rate or classification and the bill of lading shall so note.

ARTICLE 11 - WARRANTY. Seller agrees that the supplies or services furnished under this order shall be covered by the most favorable commercial warranties the Seller gives to any customer for the same or substantially similar supplies or services, or such other more favorable warranties as specified in this order. The rights and remedies so provided are in addition to and do not limit any rights afforded to University by any other article of this order. Such warranties will be effective notwithstanding prior inspection and/or acceptance of the services or supplies by the University.

ARTICLE 12 - ASSIGNMENT AND SUBCONTRACTING.

This order is assignable by University. Except as to any payment due hereunder, this order may not be assigned or subcontracted by Seller without written approval of University. In case such consent is given, it shall not relieve Seller from any of the obligations of this Agreement and any transferee or subcontractor shall be considered the agent of Seller and, as between the parties hereto, Seller shall be and remain liable as if no such transfer or subcontracting had been made.

ARTICLE 13 - EQUAL OPPORTUNITY. Seller shall not maintain or provide racially segregated facilities for employees at any establishment under its control. Seller agrees to adhere to the requirements set forth in Executive Orders 11246 and 11375, and with respect to activities occurring in the State of California, to the California Fair Employment and Housing Act (Government Code section 12900 et seq.). Expressly, Seller shall not discriminate against any employee or applicant for employment because of race, color, religion, sex, national origin, ancestry, medical condition (as defined by California Code section 12925f), marital status, age, physical and mental handicap in regard to any position for which the employee or applicant for employment is qualified, or because he or she is a disabled veteran or veteran of the Vietnam era. Seller shall further specifically undertake affirmative action regarding the hiring, promotion and treatment of women, the handicapped, and disabled veterans and veterans of the Vietnam era. Seller shall communicate this policy to all persons concerned within its company, with outside recruiting services, and the community at large. Seller shall provide the University on request a breakdown of its labor force by groups, specifying the above characteristics within job categories, and shall discuss with the University its policies and practices relating to its equal opportunity programs.

ARTICLE 14 - The clauses contained in the following paragraphs of the Federal Acquisition Regulations are incorporated by reference. The full text is available upon request:

FAR 52.222-04 Contract Work Hours and Safety Standards Act

FAR 52.222-26 Equal Opportunity

FAR 52.223-02 Clean Air and Water (If order exceeds \$100,000)

ARTICLE 15 - WORK ON UNIVERSITY OR GOVERNMENT PREMISES. If Seller's work under this order involves performance by Seller at University or United States Government owned sites or facilities, the following provisions shall apply:

A. Liens. Seller agrees that at any time upon request of University he will submit a sworn statement setting forth the work performed or material furnished by subcontractors, suppliers and materialmen, and the amount due and to become due to each, and that before the final payment called for hereunder, will if requested, submit to University a complete set of vouchers showing what payments have been made for materials and labor used in connection with the work called for hereunder.

Seller shall:

(1) Indemnify and hold harmless University from all claims, demands, causes of action or suits, of whatever nature, arising out of the services, labor and materials furnished by Seller or its subcontractors under this order, and from all laborers', materialmen's and mechanics' liens upon the real property upon which the work is located or any other property of University;

(2) Promptly notify University in writing, of any such claims, demands, causes of action, or suits brought to its attention. Seller shall forward with such notification copies of all pertinent papers received by Seller with respect to any such claims, demands, causes of action or suits and, at the request of University shall do all things and execute and deliver all appropriate documents and assignments in favor of University of all Seller's rights and claims growing out of such asserted claims as will enable University to protect its interest by litigation or otherwise.

The final payment shall not be made until Seller, if required, shall deliver to University a complete release of all liens arising out of this order, or receipts in full in lieu thereof, as University may require, and if required in either case, an affidavit that as far as it has knowledge or information, the receipts include all the labor and materials for which a lien could be filed; but Seller may, if any subcontractor refuses to furnish a release or receipt in full, furnish a bond satisfactory to University to indemnify it against any claim by lien or otherwise. If any lien or claim remains unsatisfied after all payments are made, Seller shall refund to University all monies that the latter may be compelled to pay in discharging such lien or claim, including all costs and reasonable attorneys' fees.

B. Cleaning Up. Seller shall at all times keep University premises where the work is performed and adjoining premises free from accumulations of waste material or rubbish caused by its employees or work of any of its subcontractors, and, at the completion of the work; shall remove all rubbish from and about the building and all its and its subcontractors' tools, scaffolding, and surplus materials, and shall leave the work "broom clean" or its equivalent, unless more exactly specified. In case of dispute between Seller and the subcontractors employed on or about the structure or structures upon which the work is to be done, as herein provided, as to responsibility for the removal of the rubbish, or in case the same be not promptly removed as herein required, University may remove the rubbish and charge the cost to Seller.

C. Employees. Seller shall not employ on the work any unfit person or anyone not skilled in the work assigned to him or her, and shall devote only its best-qualified personnel to work under this order. Should University deem anyone employed on the work incompetent or unfit for his or her duties and so inform Seller, Seller shall immediately remove such person from work under this order and he or she shall not again, without written permission of University, be assigned to work under this order.

It is understood that if employees of University shall perform any acts for the purpose of discharging the responsibility undertaken by the Seller in this Article 15, whether requested to perform such acts by the Seller or not, such employees of the University while performing such acts shall be considered the agents and servants of the Seller subject to the exclusive control of the Seller.

D. Safety, Health and Fire Protection. Seller shall take all reasonable precautions in the performance of the work under this order to protect the health and safety of employees and members of the public and to minimize danger from all hazards to life and property, and shall comply with all health, safety, and fire

protection regulations and requirements (including reporting requirements) of University. In the event that Seller fails to comply with said regulations or requirements of University, University may, without prejudice to any other legal or contractual rights of University, issue an order stopping all or any part of the work; thereafter a start order for resumption of work may be issued at the discretion of the University. Seller shall make no claim for extension of time or for compensation or damages by reason of or in connection with such work stoppage.

The safety of all persons employed by Seller and its subcontractors on University premises, or any other person who enters upon University premises for reasons relating to this order, shall be the sole responsibility of Seller. Seller shall at all times maintain good order among its employees and shall not employ on the work any unfit person or anyone not skilled in the work assigned to him or her. Seller shall confine its employees and all other persons who come onto University's premises at Seller's request or for reasons relating to this order and its equipment to that portion of University's premises where the work under this order is to be performed or to roads leading to and from such work sites, and to any other area which University may permit Seller to use.

Seller shall take all reasonable measures and precautions at all times to prevent injuries to or the death of any of its employees or any other person who enters upon University premises. Such measures and precautions shall include, but shall not be limited to, all safeguards and warnings necessary to protect workers and others against any conditions on Owner's premises which could be dangerous and to prevent accidents of any kind whenever work is being performed in proximity to any moving or operating machinery, equipment or facilities, whether such machinery, equipment or facilities are the property of or are being operated by, the Seller, its subcontractors, the University or other persons.

To the extent compliance is required, Seller shall comply with all University safety rules and regulations when on University premises.

ARTICLE 16 - INSURANCE

Seller shall at its expense obtain, keep in force and maintain insurance to cover its performance under this order as follows:

A. Comprehensive or Commercial Form General Liability Insurance (Contractual Liability Included)

Minimum Limits:

Each Occurrence: \$5,000,000

Products/Completed Operations: \$5,000,000

If the above insurance is written on a claims made form, it shall continue for three years following termination of this agreement. The insurance shall have a retroactive date of placement prior to or coinciding with the effective date of this agreement.

B. Business Automobile Liability: (Owned, Scheduled, Non-Owned, or Hired Automobiles) with a combined single limit of no less than \$5,000,000 per occurrence.

C. Professional Medical and Hospital Liability Insurance with limits of:

\$5,000,000 per occurrence.

\$5,000,000 General Aggregate.

If the above insurance is written on a claims made form, it shall continue for three years following termination of this agreement. The insurance shall have a retroactive date of placement prior to or coinciding with the effective date of this agreement. Coverage shall include endorsements to the insurance policies for Contractual Liability Coverage and Defense and Indemnification of University by Seller.

D. Workers' Compensation as required under California State law.

Seller, upon the execution of this agreement shall furnish University with Certificates of Insurance evidencing compliance with all requirements. Coverages referred to under A., B., and C. above shall include The Regents of the University of California as an additional insured, but only with respect to the negligent acts or

omissions of Seller, its officers, agents, employees, subcontractors or anyone directly or indirectly employed by them, or any other person or persons under its direction and control. The Certificates of Insurance shall obligate Seller's insurers to notify University at least thirty (30) days prior to cancellation of or change in any of said insurance.

ARTICLE 17 - PERMITS. Seller agrees to procure all necessary permits or licenses and abide by all applicable laws, regulations and ordinances of the United States and of the state, territory and political subdivision in which the work under this order is performed. Seller shall be liable for all damages and shall indemnify and save University harmless from and against all damages and liability which may arise out of failure of Seller to secure and pay for any such licenses or permits or to comply fully with any and all applicable laws, ordinances and regulations.

ARTICLE 18 - COOPERATION. Seller and its subcontractors, if any, shall cooperate with University and other vendors and contractors on the premises and shall so carry on their work that other cooperating vendors and contractors shall not be hindered, delayed or interfered with in the progress of their work, and so that all of such work shall be a finished and complete job of its kind.

ARTICLE 19 - WAIVER OF DEFAULT. Any failure of University at any time, or from time to time, to enforce or require the strict keeping and performance by Seller of any of the terms or conditions of this order shall not constitute a waiver by University of a breach of any such terms or conditions and shall not affect or impair such terms or conditions in any way, or the right of University at any time to avail itself of such remedies as it may have for any such breach or breaches of such terms or conditions.

ARTICLE 20 - TAXES. Seller shall pay all contributions, taxes and premiums payable under federal, state and local laws measured upon the payroll of employees engaged in the performance of work under this order, and all applicable sales, use, excise, transportation, privilege, occupational and other taxes applicable to materials and supplies furnished or work performed hereunder and shall save University harmless from liability for any such contributions, premiums, and taxes.

ARTICLE 21 - OTHER APPLICABLE LAWS. Any provision required to be included in a contract of this type by any applicable and valid federal, state or local law, ordinance, rule or regulations shall be deemed to be incorporated herein.

ARTICLE 22 - GOVERNING LAW. The law of the State of California shall control this Appendix and any document to which it is appended.

6.2 Appendix B: University of California, Business Information Form

SUPPLIER OF GOODS OR SERVICES ONLY To be completed by ALL FIRMS OR INDIVIDUALS PROPOSING TO DO BUSINESS WITH THE UNIVERSITY OF CALIFORNIA (regardless of commodity, service, or product offered.)

Initial the Business Categories That Apply:

_____ **SMALL BUSINESS ENTERPRISE (SBE)** - an independently owned and operated concern certified, or certifiable, as small business by the Federal Small Business Administration (SBA). (Size standards by Standard Industrial Classification codes may be found in the Federal Acquisition Regulations, Section 19.102. The University may rely on written representation by the vendors regarding their status.)

_____ **DISADVANTAGED BUSINESS ENTERPRISE (DBE)** - a business concern which is at least 51% owned by one or more socially and economically disadvantaged individuals or, in the case of any publicly owned business, at least 51% of the stock of which is owned by such individuals and whose management and daily business operations are controlled by one or more of such individuals. Socially disadvantaged individuals are those who have been subjected to racial or ethnic prejudice or cultural bias because of their identity as members of a group without regard to their individual qualities. Economically disadvantaged individuals are those socially disadvantaged individuals whose ability to compete in the free private enterprise system has been impaired due to diminished capital and credit opportunities as compared to others in the same business area who are not socially disadvantaged. Business owners who certify that they are members of named groups (**Asian-Indian Americans, Asian-Pacific Americans, Black Americans, Hispanic Americans, Native Americans**) are to be considered socially and economically disadvantaged.

_____ **DISABLED VETERAN BUSINESS ENTERPRISE (DVBE)** - a business that is at least 51% owned by one or more disabled veterans or, in the case of any publicly owned business, at least 51% of the stock of which is owned by such individuals and whose management and daily business operations are controlled by one or more of such individuals. A Disabled Veteran is a veteran of the military, naval, or air service of the United States with a service connected disability who is a **resident of the State of California**. To qualify as a veteran with a service connected disability, the person must be currently declared by the United States Veterans Administration to be 10% or more disabled as a result of service in the armed forces.

_____ **WOMEN-OWNED BUSINESS ENTERPRISE (WBE)** - a business that is at least 51% owned by a woman or women who also control and operate it. "Control" in this context means exercising the power to make policy decisions. "Operate" in this context means being actively involved in the day-to-day management.

PRIVACY NOTIFICATIONS

FEDERAL Pursuant to the Federal Privacy Act of 1974, you are hereby notified that the disclosure of your social security number is voluntary. This record keeping system was established pursuant to the authority of The Regents of the University of California under Art. IX, Sec. 9 of the California Constitution. The social security number is used to verify your identify.

STATE The State of California Information Practices Act of 1977 (effective July 1, 1978) requires the University of California to provide the following information to individuals who are asked to supply information about themselves:

The principal purpose of requesting the information on this form is to evaluate your qualifications as a supplier to the University and for reporting purposes in accordance with state law and University policy.

Furnishing all information (except Social Security Number) requested on this form is mandatory; failure to provide all requested information will delay or may prevent evaluation of your firm's ability to do business with the University.

CTN RFP #2008-001

I hereby certify under penalty of perjury under the laws of the State of California that I have read this application and know the contents thereof, and that the business category and ethnicity indicated above reflect the true and correct status of the business in accordance with Federal Small Business Administration criteria and Federal Acquisition Regulations, FAR 19, pertaining to small, disadvantaged, woman, disabled veteran, small and disadvantaged, and small and woman-owned business enterprises. I understand that falsely certifying the status of this business, obstructing, impeding or otherwise inhibiting any University of California official who is attempting to verify the information on this form may result in suspension from participation in University of California business contracts for a period up to 5 years and the imposition of any civil penalties allowed by law. In addition, I understand that this business must notify the University of California in writing 30 days in advance of any changes in size, ownership, control, or operation which may affect this business's continued eligibility as a SBE, DBE, WBE, DVBE, SDBE, SWBE or SDVBE.

6.3 Appendix C: Roster of CTN Participant Sites

(File Reference: Excel Spreadsheet CTN-RFP-C)

6.3.1 Purpose

Appendix C and the associated Microsoft Excel Spreadsheet (Excel Spreadsheet CTN-RFP-C) contain detailed demographic and other information for each of the CTN Participant Candidate sites. Bidders may use the information for purposes of preparing responsive bids to this RFP.

6.3.2 CTN-C the sole Contact

Bidders are advised that they are not to use the information provided for any purpose other than to prepare an RFP response. Bidders are prohibited from directly contacting any of the listed Participant Candidate sites for any purpose related to the CTN project. Bidders are specifically prohibited from contacting CTN Participant Candidates in order to clarify information provided in this RFP, or to obtain additional technical or other information for purposes of responding to this RFP.

6.3.3 Primary Contact

The CTN-C will serve as the primary contact for questions or clarifications. All questions must be submitted in writing, as stipulated in Section 1.3.1.3 of this RFP. Clarifications and any associated resulting RFP addenda will be publicly posted and made available to all Bidders at the CTN Web site.

6.3.4 CTN Participant Candidate Site Demographics

NOTE: the information provided in this section is solely for the purpose of informing Bidders of the overall geographic demographics of the complement of CTN Participant sites that are included in this RFP. Bidders will not be required to provide any responses to these specific materials.

The Current complement of potential CTN Participant sites represents approximately 750 individual locations distributed throughout the entire state. Figure C-1 below provides a high-level view of the distribution of sites. Table C-1 provides a listing of the geographic distribution of CTN Participant sites by County.

Table C-2 contains a summary of the number of Participant sites ruralities, expressed as RUCA Codes. See the following Web reference for a description of RUCA Codes:

6.4 Appendix D: Roster of RTN Sites

(File Reference: Excel Spreadsheet CTN-RFP-D)

6.4.1 Purpose

Appendix D and the associated Microsoft Excel Spreadsheet (Excel Spreadsheet CTN-RFP-D) contain detailed demographic and other information for each of the Regional Telehealth Network (RTN) Participant Candidate sites. Bidders may use the information for purposes of preparing responsive bids to this RFP. Note that only the RTN Hub sites have been identified for each RTN in Spreadsheet CTN-RFP-D. Bidders will use this information in preparing a response to Section 2.7.5: **RTN Hub and Spoke Connections**.

6.4.2 CTN-C the sole Contact

Bidders are advised that they are not to use the information provided for any purpose other than to prepare an RFP response. Bidders are prohibited from directly contacting any of the listed RTN Participant Candidate sites for any purpose related to the CTN project. Bidders are specifically prohibited from contacting RTN Participant Candidates in order to clarify information provided in this RFP, or to obtain additional technical or other information for purposes of responding to this RFP.

6.4.3 Primary Contact

The CTN-C will serve as the primary contact for questions or clarifications. All questions must be submitted in writing, as stipulated in Section 1.3.1.3 of this RFP. Clarifications and any associated resulting RFP addenda will be publicly posted and made available to all Bidders at the CTN Web site.

6.5 Appendix E: Participant and RTN Group Definitions

(File Reference: Excel Spreadsheet CTN-RFP-E)

In order to simplify Bidder's responses to the "Technical Requirements" and "Cost Reporting" sections of this RFP, Bidders are permitted to group CTN Participants and RTN's, and to provide technical or cost information that is applicable to each member of the Group.

Bidders shall use Spreadsheet E to define groups of CTN participant sites for the following two purposes:

- a. For any RFP technical requirement(s) for which Bidder references a Group, the CTN Participant members of that Group shall receive equivalent network architectural configurations and services.
- b. For any RFP cost quotation requirement(s) for which Bidder references a Group, the CTN Participant members of that Group shall receive identical pricing.

Spreadsheet CTN-RFP-CE, Tab A, contains a row entry for each CTN participant site that has been listed in Appendix C, "CTN Participant Sites."

Spreadsheet CTN-RFP-CE, Tab B, contains a row entry for each RTN Hub site that has been listed in Appendix D, "Regional Telehealth Network Participants."

Bidder shall use standardized Group Identifiers

Group Identifiers for Participant sites shall be in the format: GP-1, GP-2, ..., GP-19, etc.

Group Identifiers for RTN Hub sites shall be in the format: GR-1, GR-2, ..., GR-19, etc.

Bidders shall signify within Spreadsheet CTN-RFP-CE, a Participant site's membership in a group by placing an 'X' in the appropriate column and cell.

Bidders shall signify within Spreadsheet CTN-RFP-CE, Tab B, an RTN Hub site's membership in a group by placing an 'X' in the appropriate column and cell.

Bidders may add additional group definitions by inserting additional column sets as needed.

6.6 Appendix F: Cost Reporting Worksheets

6.6.1 Participant Cost Items Worksheet (PCI)

(File Reference: Excel Spreadsheet CTN-RFP-F-1)

Bidders will report comprehensive cost quotations for connecting each individual CTN participant site to the CTN, using the PCI worksheet.

Instructions

- 1) Spreadsheet CTN-RFP-F-1 contains a section reference to all mandatory and mandatory optional items that should be priced in this spreadsheet.
- 2) Bidders are required to provide cost quotations for every participant listed in Appendix C.
- 3) Bidders may group participants for the purpose of reporting costs. Each CTN participant member of a Bidder-defined Group shall receive identical pricing.
- 4) Bidder shall define participant groups in Spreadsheet E. Instructions for completing Spreadsheet E are located in Appendix E of this RFP.
- 5) Spreadsheet CTN-RFP-F-1 contains multiple column sets, one set for each Bidder-defined Participant Group. Each column set contains a column for Non-Recurring (NR) and Recurring (R) costs. Bidders who define multiple Participant groups shall insert additional column sets as required to report cost quotations for each defined participant group. Bidders who support statewide pricing may only require one column set. In the extreme case where Bidders wish to report a unique price for each participant site, the resulting CTN-RFP-F-1 spreadsheet will contain over 750 column sets.
- 6) Bidders may include additional cost items within Spreadsheet CTN-RFP-F-1 by inserting additional rows as necessary.
 - Bidders should include such items in the most relevant section of the spreadsheet and include the item costs in the column totals as appropriate.
 - Bidders should clearly identify the additional item(s) in the “Description” column, expanding the description by footnote if necessary.
 - Bidder-added rows shall be flagged by placing an asterisk (*) in the “Section Reference” column.
- 7) The number of participants represented by each Group shall be included in the designated column labeled: “# Participants” in Spreadsheet CTN-RFP-F-1.
- 8) The total of all “# Participants” columns must equal the total number of participant sites listed in Appendix C.
- 9) Bidders may enter cost quotations in the following formats:
 - a) Actual cost – a cost reported as a numerical value, denominated in US dollars.

CTN RFP #2008-001

- b) No Cost – designated as “N/C”, indicating that Bidder is providing the feature or service at no additional cost.
 - c) Not Priced Individually – designated as “NPI”, indicating that the item cost is included within an aggregate equipment or service cost that is reported within a different row of Spreadsheet CTN-RFP-F-1, or elsewhere in Bidder’s cost proposal.
 - d) Not Applicable – designated as “N/A”. Bidder’s technical design and/or services offerings do not require the requested feature.
- 10) Recurring costs shall be reported as a monthly, “per participant” cost.
- 11) Non-recurring costs shall be reported as a “per-participant” cost (see the “Aggregate Cost Reporting” note below, for exceptions).

Aggregate Cost Reporting

Aggregate Costs, or costs that apply to the entire CTN project, should not be reported in Spreadsheet CTN-RFP-F-1. Examples of such costs might be: 1) initial network “setup” fees, Customer Support Center service initiation fees, Project management initiation fees, etc.). Bidders shall itemize all aggregate costs in either the “Core and Regional Hub” worksheet (Spreadsheet CTN-RFP-F-2), or the “Ancillary Services and Miscellaneous Costs” worksheet (Spreadsheet CTN-RFP-F-4), whichever is most applicable.

6.6.2 CTN Regional Hub and Core Cost Worksheet (RHCC)

(File Reference: Excel Spreadsheet CTN-RFP-F-2)

Bidders shall report comprehensive cost quotations for establishing and maintaining Regional Hub and Core Network infrastructure using the RHCC Worksheet. Bidders shall also report cost quotations for connecting RTN hubs listed in Appendix D using the RHCC worksheet. Separate 'tabs' have been provided within Spreadsheet CTN-RFP-F-2 for each category of cost proposal:

- CTN Regional Hubs (tab A)
- Core Network and Network Architecture (tab B)
- Regional Telehealth Network Hubs (RTN Hubs, tab C)

Instructions

- 1) Spreadsheet CTN-RFP-F-2 contains section references to all mandatory and mandatory optional items that should be priced in this spreadsheet.
- 2) Bidders shall provide recurring and nonrecurring costs for each proposed Hub site.
- 3) Bidders may insert additional row sets in Spreadsheet CTN-RFP-F-2 as necessary in order to report costs for each proposed CTN Hub site.
- 4) Bidders shall provide recurring and nonrecurring costs for Core network infrastructure.
- 5) Bidders may insert additional rows that identify additional Core network costs categories not present in spreadsheet CTN-RFP-F-2.
- 6) Bidder shall report recurring and nonrecurring costs for connecting each RTN Hub site listed in Appendix D.
- 7) Bidder may insert additional rows in spreadsheet CTN-RFP-F-2 as necessary in order to provide individual cost quotations for each RTN Hub site.
- 8) Bidders may enter cost quotations in the following formats:
 - a. Actual cost – a cost reported as a numerical value, denominated in US dollars.
 - b. No Cost – designated as “N/C”, indicating that Bidder is providing the feature or service at no additional cost.
 - c. Not Priced Individually – designated as “NPI”, indicating that the item cost is included within an aggregate equipment or service cost that is reported within a different row of Spreadsheet CTN-RFP-F-2, or elsewhere in Bidder’s cost proposal.
 - d. Not Applicable – designated as “N/A”. Bidder’s technical design and/or services offerings do not require the requested feature.
- 9) For CTN Hubs and RTN Hub connections:
 - a) Recurring costs shall be reported as a monthly, “per site” cost (see the “Aggregate Cost Reporting” note below, for exceptions). If CTN Hubs or RTN Hub connections are priced individually, Bidders may insert additional column sets as necessary to report individual costs for each CTN Hub site or RTN Hub site.
 - b) Non-recurring costs shall be reported as a “per site” cost (see the “Aggregate Cost Reporting” note below, for exceptions).
- 10) For Core Network Costs:

CTN RFP #2008-001

- a) Non-Recurring and Recurring Costs may be reported as aggregate costs, or on a Core site basis. Bidder shall clearly indicate which pricing methodology is employed. Bidder may insert additional rows and columns as necessary to clearly and completely itemize Core network costs.

Aggregate Cost Reporting

Aggregate Costs, or costs that apply to the entire CTN project, should not be reported in Spreadsheet CTN-RFP-F-2. Examples of such costs might be: 1) core network “setup” fees, Customer Support Center service initiation fees, Project management initiation fees, etc.). Bidders shall itemize all aggregate costs in a separate “Miscellaneous Costs” Worksheet (spreadsheet CTN-RFP-F-4).

6.6.3 External Network Connection Worksheet (ENC)

(File Reference: Excel Spreadsheet CTN-RFP-F-3)

Bidders shall use Spreadsheet CTN-RFP-F-3 to report detailed cost information for connecting the CTN to the External Networks tabulated in Section 2.12.

Instructions

Spreadsheet CTN-RFP-F-3 contains section references to all mandatory and mandatory optional items that should be priced in this spreadsheet.

1. Bidders shall provide recurring and nonrecurring costs for each external network.
2. Bidders may insert additional rows in Spreadsheet CTN-RFP-F-3 as necessary in order to thoroughly and clearly report costs for each external network.
3. Bidders may enter cost quotations in the following formats:
 - a. Actual cost – a cost reported as a numerical value, denominated in US dollars.
 - b. No Cost – designated as “N/C”, indicating that Bidder is providing the feature or service at no additional cost.
 - c. Not Priced Individually – designated as “NPI”, indicating that the item cost is included within an aggregate equipment or service cost that is reported within a different row of Spreadsheet CTN-RFP-F-3, or elsewhere in Bidder’s cost proposal.
 - d. Not Applicable – designated as “N/A”. Bidder’s technical design and/or services offerings do not require the requested feature.
4. Recurring costs shall be reported as a monthly, “per network connection” cost.
5. Bidders shall not use Group Identifiers for reporting costs within this worksheet.

6.6.4 Ancillary Services and Miscellaneous Costs Worksheet

(File Reference: Excel Spreadsheet CTN-RFP-F-4)

Bidders shall use Spreadsheet CTN-RFP-F-4 to report detailed cost information for the requested Ancillary Services, as well as any additional miscellaneous costs not reported elsewhere.

Aggregate Pricing: for purposes of providing standardized pricing for services where pricing is based upon number of sites, or number of users, Bidder shall report such pricing based upon the following two subscription levels:

Subscription Level One

- Total sites: 375
- Total Users: 4000
- Total External Network Connections: 4

Subscription Level Two

- Total sites: 750
- Total Users: 8000

1. Spreadsheet CTN-RFP-F-4 contains section references to all mandatory and mandatory optional Ancillary Services items that should be priced in this spreadsheet (e.g., firewall services, web content filtering service, etc.).
2. Bidders shall provide recurring and nonrecurring costs for each Ancillary Service.
3. Bidders may insert additional rows in Spreadsheet CTN-RFP-F-4 as necessary in order to thoroughly and clearly report costs for Ancillary Services.
4. Bidders may enter cost quotations for Ancillary Services in the following formats:
 - a. Actual cost – a cost reported as a numerical value, denominated in US dollars.
 - b. No Cost – designated as “N/C”, indicating that Bidder is providing the feature or service at no additional cost.
 - c. Not Priced Individually – designated as “NPI”, indicating that the item cost is included within an aggregate equipment or service cost that is reported within a different row of Spreadsheet CTN-RFP-F-4, or elsewhere in Bidder’s cost proposal.
 - d. Not Applicable – designated as “N/A”. Bidder’s technical design and/or services offerings do not require the requested feature.
5. Aggregate costs shall be calculated on the “site” or “user” quantities stated above.
6. Bidders shall provide recurring and nonrecurring costs for each Ancillary Service.
7. Bidders may insert additional rows in Spreadsheet CTN-RFP-F-4 as necessary in order to thoroughly and clearly report costs for Ancillary Services.
8. Miscellaneous Costs not provided elsewhere shall be included under the ‘Miscellaneous’ tab.
9. Wherever possible, Bidder should reference the RFP Section that most closely pertains to a miscellaneous charge.

CTN RFP #2008-001

10. Miscellaneous charges shall be categorized as Recurring or Nonrecurring.

6.7 Appendix G: Glossary of Abbreviations

AMUC – Average Monthly Usage Cost
CE – Customer Edge
CLEC – Competitive Local Exchange Carrier
CO – Central Office
CPOE – Customer Point of Entry
CTN - California Telehealth Network
DSCP – differentiated services code point
FCC – Federal Communications Commission
ILEC – Incumbent Local Exchange Carrier
ISP – Internet Service Provider
MPLS – Multi-Protocol Label Switching
PE-POP– Provider Edge Point of Presence
POP – Point of Presence
RH – Regional Hub
RTN – Regional Telehealth Network
RHCPP – Rural Health Care Pilot Program
NAT – Network Address Translation
TMRC – Total Monthly Recurring cost
USAC – Universal Services Administrative Company
